1. Introduction to Colors, Sizes and Materials Swatch v.2.0

Add swatches to configurable products easily with **Magento Colors, Sizes and Materials Swatch**. Users click visually appealing swatches and product image as well as thumbs change respectively. Swatch icons are uploaded right through the admin panel either for the whole configurable attribute or for a particular product when they are supposed to be different for each product. Swatches of out-of-stock products can be set to be displayed.

Key features:

- Replace configurable product options with swatches;
- Upload swatches both for attributes and products;
- Swatch icons uploaded in the back office;
- Change product images and thumbs when applying product options;
- Configure swatches size;
- Integrated zoom feature with flexible settings;

Overall information

Magento Colors, Sizes and Materials Swatch is an outstanding professional tool to set up Magento configurable products. It is perfect for huge and growing clothes stores or any other store which needs to grant its customer a possibility for great shopping.

Upload swatch icons easily in the admin office. You may assign swatches to attributes so that they would be displayed globally for all the products that have these attributes enabled. There is also an option of uploading special swatches for particular products.

Change the size of product images for them to fit your store's theme. And of course enjoy Magento Colors, Sizes and Materials Swatch image zoom bonus.

2. How to Install and Deactivate

Step 1. Check Permissions.

Make sure the "app" and "skin" directories of your Magento and all directories inside them have full written permissions or set permissions on each directory equal to 777 or 0777.

Important! Change all permissions back after installation.

Read more about permissions [here](#).

Step 2: Use FTP client to upload all folders from the zip package to your Magento site root folder. Be sure that you upload them to the correct directories.

Step 3: Login to your Magento administration panel

Step 4: Refresh cache (go to System > Cache Management and select Refresh) and disable compilation (go to System > Tools > Compilation and select Disable)

Step 5: Rlogin to admin panel (log out and back into Magento Admin Panel).

Step 6: Go to System > Configuration > Colors, Sizes and Materials Swatch and choose the right settings of extension.

Recommended: You may go to the frontend and try to check out. This will help you to be sure that Referral Bonus and Reward System is working.

Step 7: Go to System > Tools > Compilation and select Enable.

How to Deactivate

Step 1. Disable Extension.

Log into Magento Admin Panel and go to System → Configuration → Colors, Sizes and Materials Swatch → Settings

Select "Disable" to deactivate the extension. Click "Save Config" button. The extension is now deactivated.

Step 2. Clear cache.

Go to System → Cache Management. Clear the store cache.

3. How to Configure

Now, when the module is installed, it is high time to set up proper configurations. Go to your admin panel to System – Configuration – Colors, Sizes and Materials swatch. There you will see three main sections which make the main module settings. Let's start with the Colors, Sizes and Materials Swatch section.

This section is comprised of the following options:

- **Enabled** – select Enable to switch on the module;
- **Show not available variants** – select Yes if you want to also display items, which are not available in stock;
- **Image Switcher Enabled** – this option allows changing the image of an item when different attributes are selected on the frontend;
- **Attributes that change images** – select attributes that will trigger the changing of an image on the frontend. If you have only one attributed selected here, then uploading an image even to one simple product will affect the whole group of simple products which are related to the same attribute. However, if two or more attributes are selected in this field, then you will need to upload an image for each simple product to make the picture change on the frontend upon choosing different attributes. You can also create different sets of attributes for different types of products. For example, in our case we created a separate set of attributes for shoes and a separate set of attributed for clothes;
- **Show 'Photo not available' message** – select Yes if you want to display a specific text for items without an image;
- **Message** – specify the text which will be displayed on the frontend for items without a photo;
- **Product view** – this option is inherited from the module 'Product Zoom Light';
- **Display number of products remaining** – enable this option if you want to display a special notification for a product that has only certain number of items remaining;
- **Display when number of products left** – set the number of remaining items, when the special notification should be displayed;
- **Message** – enter the text message which should be displayed on the frontend for a product

when the specified number of items is left.

Next section is **Attribute icon**.

In this part you can select those attributes which you want to output not as a standard Magento dropdown list but either as an icon or color or text.

Here you can find the following parameters:

- **Attributes to replace** – select the attributes which you want to be displayed either as an icon or text or color;
- **Swatch width/swatch height** – set up dimensions of the swatch icons;
- **Product list icon width/height** – set up dimensions of swatch icons on a category page.

How to assign specific icons for an attribute?

If you need to assign specific icons for an attribute (such as color, icon or text) that you are going to use for various products associated with that attribute, you need to go to Catalog – Attributes – Manage Attributes – click the necessary attribute – go to the Attribute Icons tab.

Here you will see the list of options which this specific attribute has. Assigning more options for an attribute will allow you later to use this very attribute for different type of products and items.

Available attribute icons

Option	Ico		Description									
Black Color Image Text Color Color - Category / Image - Product Page Image - Category / Image - Product Page	000000	<table border="1"> <thead> <tr> <th>Image</th> <th>Description</th> <th>Remove</th> </tr> </thead> <tbody> <tr> <td>No image</td> <td><input type="radio"/></td> <td><input type="checkbox"/></td> </tr> <tr> <td></td> <td><input checked="" type="radio"/></td> <td><input type="checkbox"/></td> </tr> </tbody> </table> Browse Files... Upload Files	Image	Description	Remove	No image	<input type="radio"/>	<input type="checkbox"/>		<input checked="" type="radio"/>	<input type="checkbox"/>	Black
Image	Description	Remove										
No image	<input type="radio"/>	<input type="checkbox"/>										
	<input checked="" type="radio"/>	<input type="checkbox"/>										
White Color	FFFFFF	<table border="1"> <thead> <tr> <th>Image</th> <th>Description</th> <th>Remove</th> </tr> </thead> <tbody> <tr> <td>No image</td> <td><input type="radio"/></td> <td><input type="checkbox"/></td> </tr> <tr> <td></td> <td><input checked="" type="radio"/></td> <td><input type="checkbox"/></td> </tr> </tbody> </table> Browse Files... Upload Files	Image	Description	Remove	No image	<input type="radio"/>	<input type="checkbox"/>		<input checked="" type="radio"/>	<input type="checkbox"/>	White
Image	Description	Remove										
No image	<input type="radio"/>	<input type="checkbox"/>										
	<input checked="" type="radio"/>	<input type="checkbox"/>										
Beige Color	FFBB80	<table border="1"> <thead> <tr> <th>Image</th> <th>Description</th> <th>Remove</th> </tr> </thead> <tbody> <tr> <td>No image</td> <td><input type="radio"/></td> <td><input type="checkbox"/></td> </tr> </tbody> </table> Browse Files... Upload Files	Image	Description	Remove	No image	<input type="radio"/>	<input type="checkbox"/>				
Image	Description	Remove										
No image	<input type="radio"/>	<input type="checkbox"/>										

Each option has a dropdown list where you can select to use either an image or color or text as a description for an attribute.

The settings allow not only setting a specific color or text as an attribute description, but even to upload different images which will be used as an attribute icon and an attribute description separately.

Uploading different images as icon and description pictures

The screenshot shows the 'Attributes' management interface for the 'Color' attribute. It features a table with columns for 'Option', 'Ico', and 'Description'. The 'Option' column lists 'Black' and 'Image'. The 'Ico' column has a 'No image' placeholder and a black square icon. The 'Description' column has a text input field. A 'Use Default' checkbox is also present. Arrows point from the 'Ico' and 'Description' columns to a handwritten note: 'Upload different images and set them to be used as an icon and description pics'. Below the table are 'Browse Files...' and 'Upload Files' buttons.

Option	Ico	Description

\$49.50

Quick Overview

A truly Incredible sport bra, with new padded straps for more comfort than ever and a cushioned underwire for maximum support. Perfect for running, boxing and...

- **Lilac / Black** - this color has no photo available. Once the color is selected a message is displayed about missing color.
- **Stratus Grey / Sunset Glow Mesh** - The color with limited stock - the products under it are almost out of stock and a special message will display once you select all options that you have to buy it quicker
- Not all options HAVE to be separate icons. **Cup Size** is specifically meant to have a default no-icon selection

Different images are used as an icon and as a description

* Required Fields

In case you do not want a description window to pop-up, simply leave this field empty and do not upload any image for that option.

How to create individual attribute icons for a product?

If you do not want to use default options but wish to assign some specific attribute icons for a particular configurable product go to **Catalog – Manage products** – click the required configurable product – go to the **Attribute Icons** tab.

Here you see the list of all available attribute options which you can select and use when creating a simple product.

Setting up custom attribute icons for a simple product

List of all available attribute options

Disable the Use Default box if you wish to create a unique icon for that specific product

Option	Icon	Description														
Black Color ▾			Black <input checked="" type="checkbox"/> Use Default													
White Color ▾			White <input checked="" type="checkbox"/> Use Default													
Jungle Palms Print / Hello Lovely Mesh Image ▾	Upload and Choose Image	<table border="1"> <thead> <tr> <th>Image</th> <th>Icon</th> <th>Description</th> <th>Remove</th> </tr> </thead> <tbody> <tr> <td>No image</td> <td><input type="radio"/></td> <td><input type="radio"/></td> <td><input type="checkbox"/></td> </tr> <tr> <td></td> <td><input checked="" type="radio"/></td> <td><input checked="" type="radio"/></td> <td><input type="checkbox"/></td> </tr> </tbody> </table> Browse Files... Upload Files	Image	Icon	Description	Remove	No image	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>		<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>	Jungle Palms Print / Hello Lovely Mesh <input type="text"/>	<input type="checkbox"/> Use Default
Image	Icon	Description	Remove													
No image	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>													
	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>													
Pop Lime Mesh Image ▾	Upload and Choose Image	<table border="1"> <thead> <tr> <th>Image</th> <th>Icon</th> <th>Description</th> <th>Remove</th> </tr> </thead> <tbody> <tr> <td>No image</td> <td><input type="radio"/></td> <td><input type="radio"/></td> <td><input type="checkbox"/></td> </tr> <tr> <td></td> <td><input checked="" type="radio"/></td> <td><input checked="" type="radio"/></td> <td><input type="checkbox"/></td> </tr> </tbody> </table> Browse Files... Upload Files	Image	Icon	Description	Remove	No image	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>		<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>	Pop Lime Mesh <input type="text"/>	<input type="checkbox"/> Use Default
Image	Icon	Description	Remove													
No image	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>													
	<input checked="" type="radio"/>	<input checked="" type="radio"/>	<input type="checkbox"/>													

To create a custom option simply disable the **Use Default** box and then customize the option to your liking.

This way images uploaded for a specific product will be displayed for that product only, while uploading images for an attribute make them appear for all products associated that attribute.

In case an option does not have an icon yet, then by default it is considered as a text option and the description field will contain just the attribute name.

Setting up different images for category pages and product pages

Module configurations also let you upload and use different images for product pages and category pages. For instance, your category page may show just color icons while the product page may display images for the same attribute.

These configurations are available under the **Catalog – Manage products** – click a configurable product – go to **Attribute icons**.

In the dropdown list select **Color-Category/Image – Product page**:

Option	Ico	Description	Remove
Black	000000		
Color - Category / Image - Product Page			
	No image		
			
			

Browse Files... Upload Files

The above settings let you display a color icon on the category page, while the product page will show an image which you download and select here.

If you select **Image-Category/Image – Product page** you will be able to assign different images to be used on a category page and product page.

Option	Ico	Description																				
Black Image - Category / Image - Product Page ▼	Upload and Choose Image	<table border="1"> <thead> <tr> <th>Image</th> <th>Ico</th> <th>Ico Category</th> <th>Description</th> <th>Remove</th> </tr> </thead> <tbody> <tr> <td>No image</td> <td><input type="radio"/></td> <td><input checked="" type="radio"/></td> <td><input checked="" type="radio"/></td> <td></td> </tr> <tr> <td></td> <td><input type="radio"/></td> <td><input type="radio"/></td> <td><input type="radio"/></td> <td><input type="checkbox"/></td> </tr> <tr> <td></td> <td><input checked="" type="radio"/></td> <td><input type="radio"/></td> <td><input type="radio"/></td> <td><input type="checkbox"/></td> </tr> </tbody> </table> <div> Browse Files... Upload Files </div>	Image	Ico	Ico Category	Description	Remove	No image	<input type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>		<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>
Image	Ico	Ico Category	Description	Remove																		
No image	<input type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>																			
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>																		
	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="checkbox"/>																		

4. How to Use

Now let's see how this module will look like on your website.

When a customer visits a product page he sees a full range of options to select from: size, color, material and other available parameters.

Attribute icons on the frontend

The screenshot shows a product page for 'Incredible Sport Bra'. It includes a main image of a woman wearing the bra, a 'MORE VIEWS' section with four smaller images, and a selection area for 'Color', 'Size', and 'Cup Size'. The 'Color' section displays a row of 15 color swatches. The 'Size' section has buttons for 32, 34, 36, and 38. The 'Cup Size' section has a dropdown menu with 'Choose an Option...' selected. Below the selection area, the price '\$49.50' is shown. To the right of the main image, there is a 'Quick Overview' section with a description and two bullet points: '- Lilac / Black - this color has no photo available. Once the color is selected a message is displayed about missing color.' and '- Stratus Grey / Sunset Glow Mesh - The color with limited stock - the products under it are almost out of stock and a special message will display once you select all options that you have to buy it quicker'. A note at the bottom right states: '- Not all options HAVE to be separate icons. Cup Size is specifically meant to have a default no-icon selection'.

Available options are displayed both as a default dropdown list and as icon

An icon can be supplied with a description window which includes enlarged swatch and a text message.
