1. Introduction to Framer

Magento Framer is a professional tool for those who sell picture frames - decorative edgings for paintings or photographs. This extension helps users customize the frame by defining its size, material, color, thickness, mounts, glazing and more. Frame template is displayed instantly according to the options selected. Customers can upload their pictures and insert them into the frame they created. Accessories can be sold together with the frame.

Key features:

- Perfect tool to sell frames;
- Selected options are demonstrated in the generated image instantly;
- Upload patterns for mounts and glazing;
- Assign associated accessories;
- Possibility of uploading and displaying customer images within frame;
- Possibility of selecting and customizing multiple mounts;
- Thickness configuration;
- 360° frame view;
- Flexible price configuration;
- Wall view.

Overall information

Let the users create the dream frame with **Magento Framer**! When every single detail is taken into account, the frame along with its mounts will not only protect but complement the artwork.

Frame creation process is easy and fun. Step by step, customer can define the size of the frame and number of pictures within the frame, configure mounts and thickness, select suitable glazing options and accessories. The detailed order review is available after all the options selected. Image uploader allows uploading and editing pictures for the frame to look as realistic as possible.

Upload frame and mount swatches easily in the back office. Frames can be displayed in 360° View.

2. How to Install and Deactivate

How to Install

Step 1. Check Permissions.

Make sure the "app", "skin", "media" and "js" directories of your Magento and all directories inside them have full written permissions or set permissions on each directory equal to 777 or 0777. **Important! Change all permissions back after installation.**

Read more about permissions

[here](#). Step 2. Disable Cache.

Log into Magento Admin Panel and go to System → Cache Management and disable cache. Read more about Cache Management [here](#).

Step 3. Disable Compilation.

Log into Magento Admin Panel and go to System → Tools → Compilation and disable the compilation. Step 4. Upload files

Upload all files and folders from folder to the installation directory of your Magento software using an FTP client.

Step 5. Re-login.

Log out and back into Magento Admin Panel. Step 6. Enable extension.

- a) Go to System → Configuration. In the left column you will see the new tab – Belvg Extensions.
- b) Enable extension for the whole website or selected store.

Now extension is installed and enabled.

After this step you can change all permissions, cache and compilation settings back.

How to Deactivate

Step 1. Disable Extension.

Log into Magento Admin Panel and go to System → Configuration → Framer → Settings

Select "Disable" to deactivate the extension (its functionality will no longer display in the front end). Click "Save Config" button.

The extension is now deactivated.

Step 2. Clear cache.

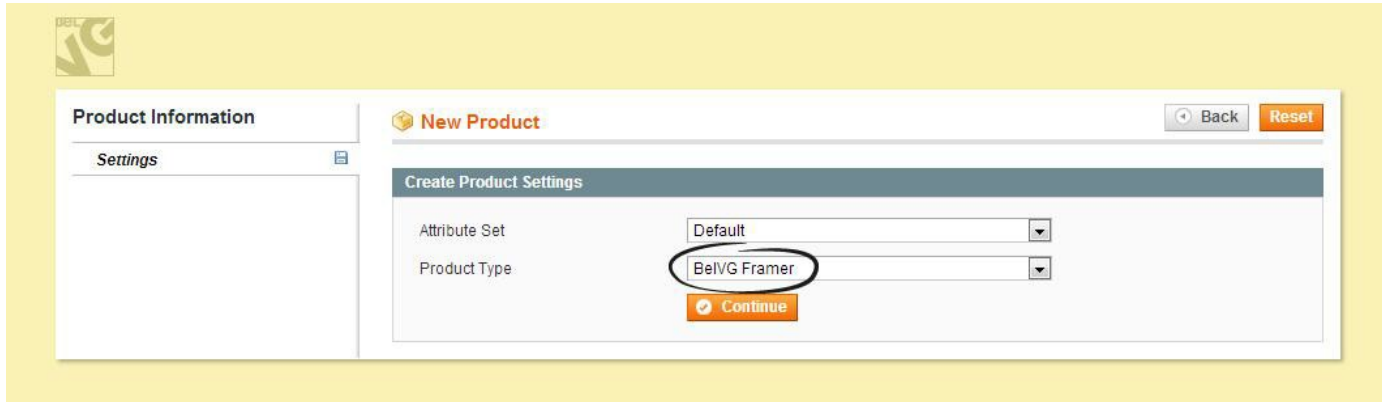

Go to System → Cache Management.

Clear the store cache.

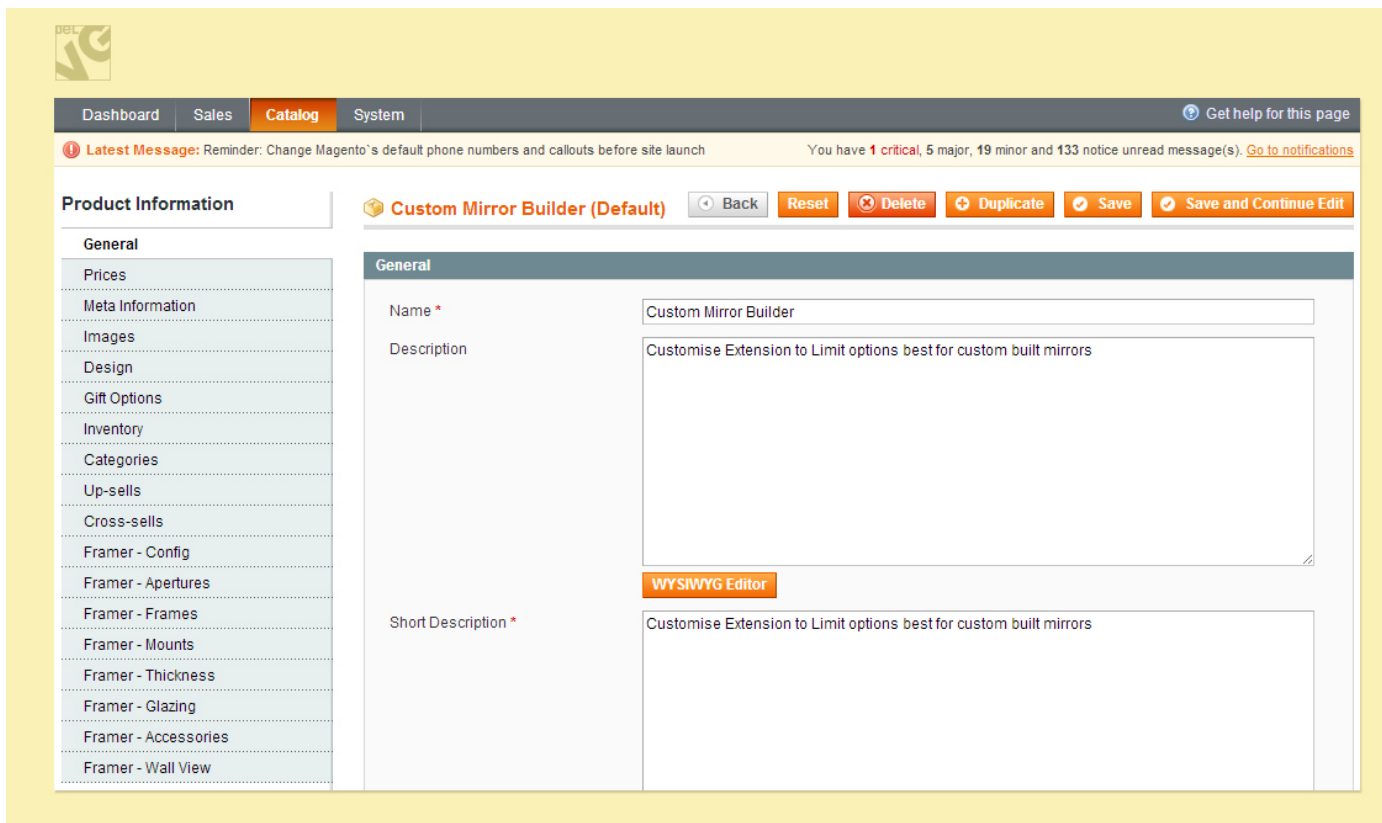

3. How to Configure

3.1. Configuring Framer Products

In order to create a Framer product, go to *Catalog -> Manage Products*. Click the **Add Product** button. In the **Product Type** drop-down menu, select **BelVG Framer**.

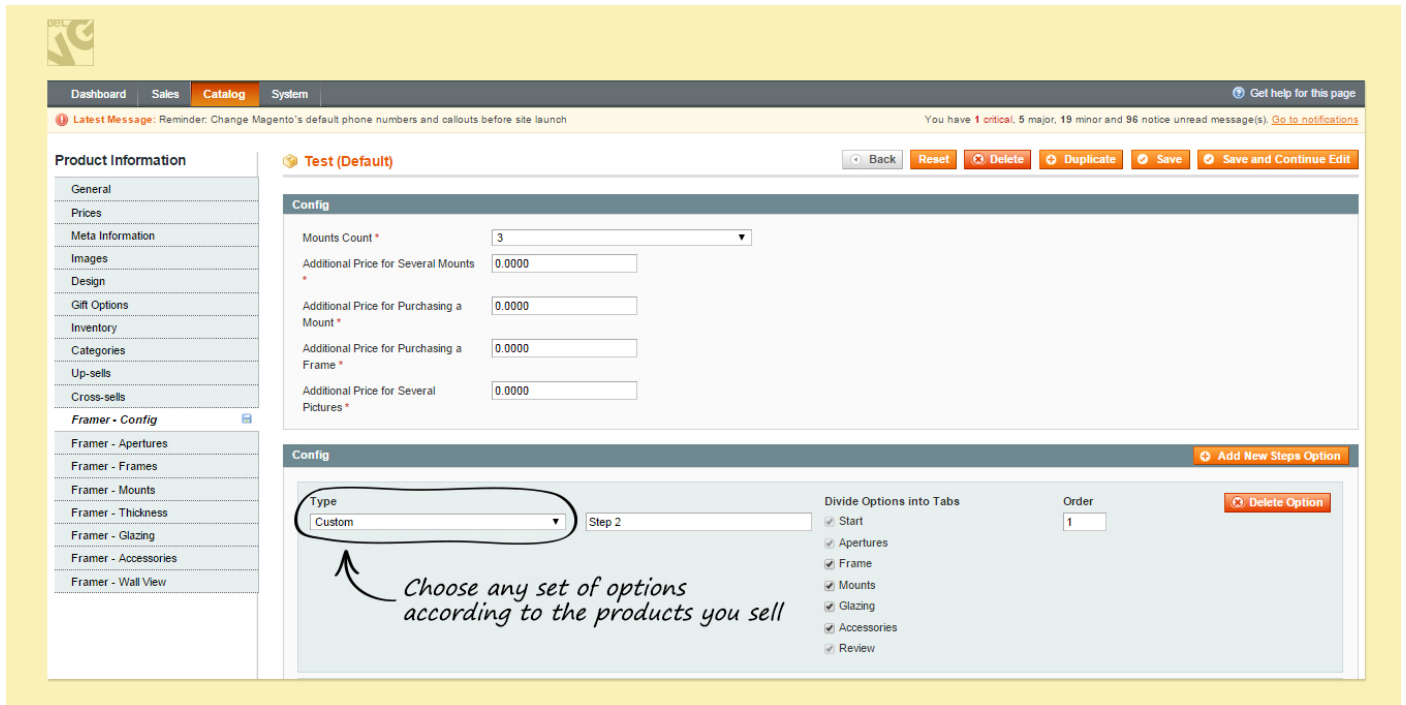

Except for the default product information tabs, custom Framer ones are now displayed. This is where you should configure the Framer options.

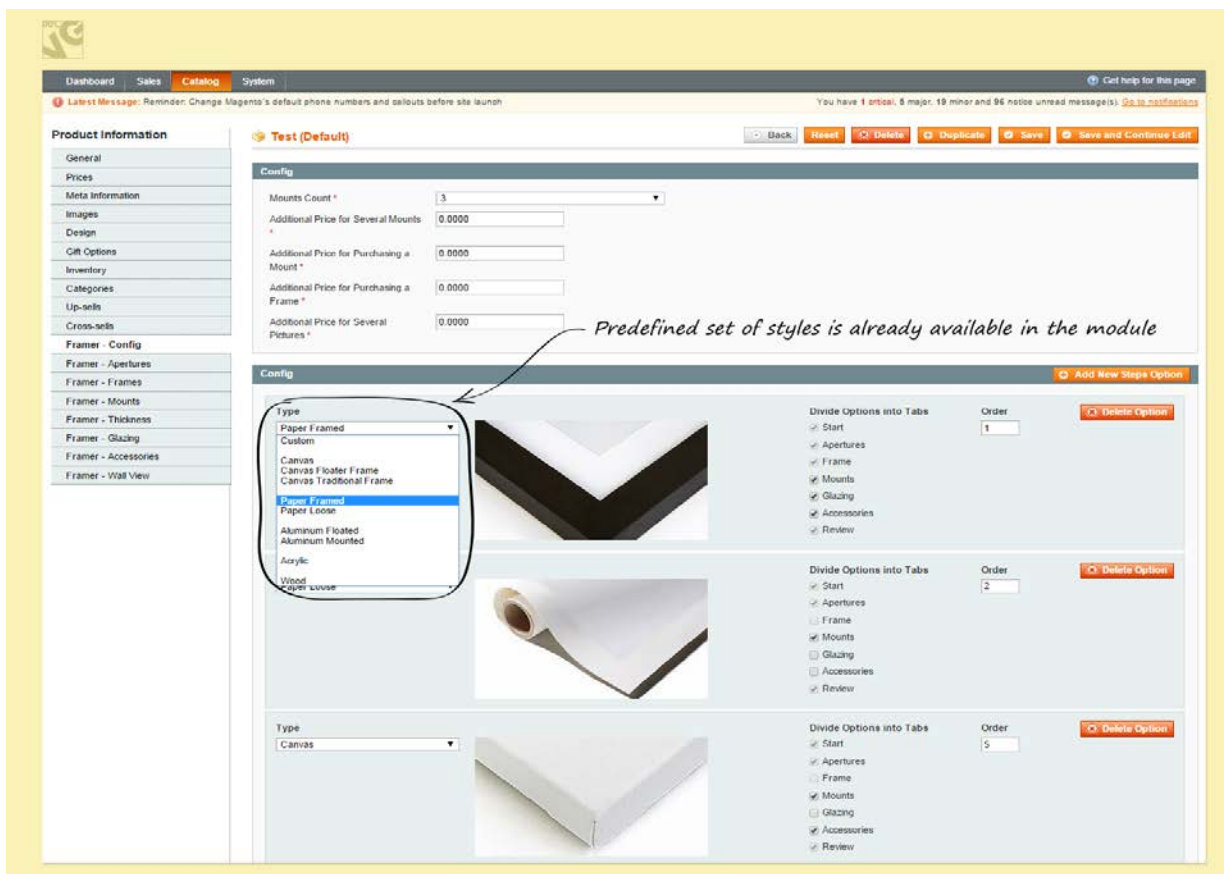

Let's take an overview of all new sections and their features which are added to the Product Information section once the module is installed.

- **Framer – Config section**

Here you can choose any set of options according to the products you sell (frames, glasses or mirrors, art, posters).

The module comes with a predefined set of styles for selling printed art which you can choose from the dropdown menu.

This section is responsible for managing your printing styles and assigning specific options for each type you have on the site.

Add different types of frames to you website

For each frame assign specific combination of options

Apart from assigning specific tabs, you can also define different materials, so that customers will see on the product page what materials are available for the chosen frame.

To do that, go to *Catalog – Framer – Manage Materials* and click **Add New Material**.

Then you will have to give name, description of the material and also choose frames that will be associated with it.

Edit Block 'Premium Archival Grade Glossy Canvas'

Config

Title * Premium Archival Grade Glossy Canvas

Description With a glossy finish formula specially designed for premium water-based pigmented ink sets, this canvas lovingly recreates the texture and reflectivity of oils on canvas. It also lends a fine art feel to photographs, especially portraiture. Premium Archival Glossy Grade Canvas has a bright white tone and is made from an acid-free poly-cotton blend for archival longevity.

Each material can be associate with several types

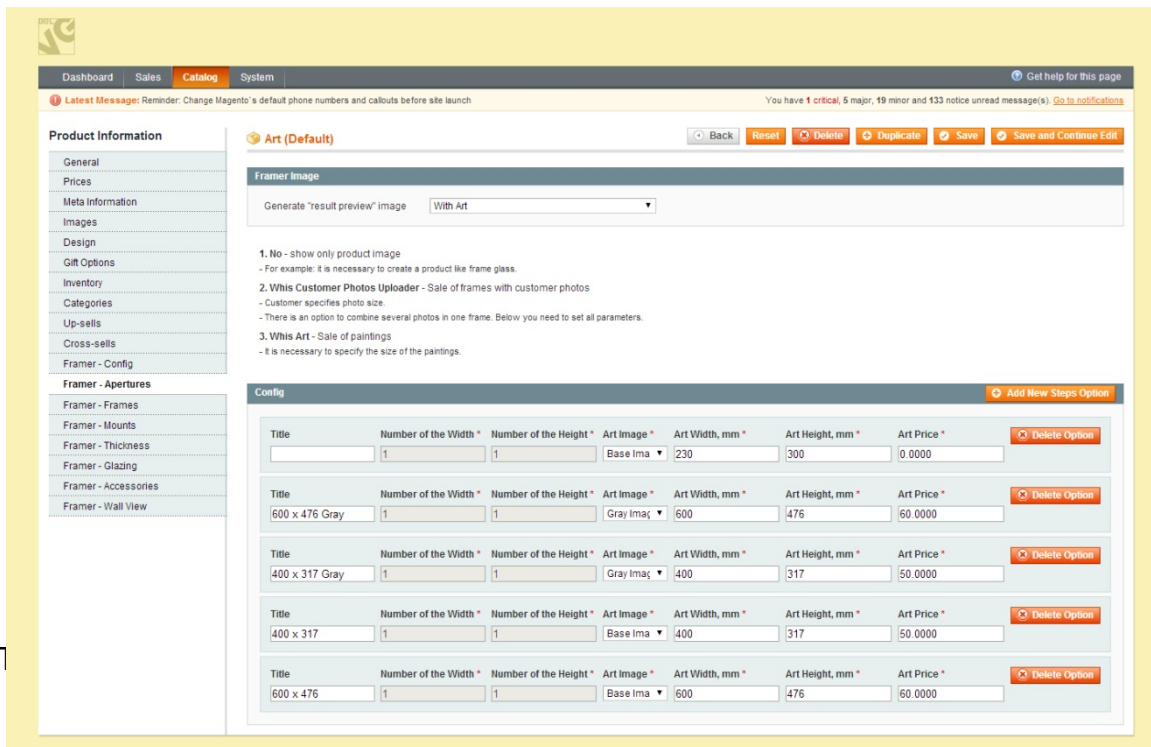

You can also associate frames with Frame Types. To do that, go to *Catalog – Framer – Manage Frames* choose a frame you want to and click **Edit**.

The screenshot shows the 'Edit Frame' configuration page for 'Blick Barrister Frames'. The page has a sidebar on the left with 'Change Frame' and 'Frame Information' (more Color, Associated Products, View 360). The main area is titled 'Edit Frame "Blick Barrister Frames"' and includes a 'Config' section. In the 'Framer Types' dropdown, a list of frame types is shown, with 'Canvas' highlighted. A handwritten note with an arrow points to this list, stating 'Associate frames with available types'. Below the dropdown, there is a 'Short Description' field with the text 'Features an elegant teardrop design border that complements traditional or contemporary settings.' and a 'Description' field with a rich text editor containing the text 'The high quality, hand-rubbed finishes bring out the best in your artwork, photos, or mirrors. 3/8" rabbit. Note — Hanging hardware not included.' and a 'Path' field with the value 'p'.

- **Framer – Apertures**

In this tab you can configure possible number of images and their arrangement, if applicable.

The screenshot shows the 'Framer - Apertures' configuration page. The sidebar on the left includes 'Product Information' (General, Prices, Meta Information, Images, Design, Gift Options, Inventory, Categories, Up-sells, Cross-sells, Framer - Config) and 'Framer - Apertures' (Framer - Frames, Framer - Mounts, Framer - Thickness, Framer - Glazing, Framer - Accessories, Framer - Wall View). The main area is titled 'Art (Default)' and includes a 'Framer Image' section with a 'Generate "result preview" image' button and a 'With Art' dropdown. Below this, there are three numbered instructions: 1. No - show only product image, 2. Whis Customer Photos Uploader - Sale of frames with customer photos, and 3. Whis Art - Sale of paintings. The 'Config' section contains a table with columns for Title, Number of the Width, Number of the Height, Art Image, Art Width, mm, Art Height, mm, and Art Price. The table lists five configurations for different frame sizes and prices.

Title	Number of the Width	Number of the Height	Art Image	Art Width, mm	Art Height, mm	Art Price
600 x 476 Gray	1	1	Base ima	230	300	0.0000
400 x 317 Gray	1	1	Gray ima	600	476	60.0000
400 x 317	1	1	Gray ima	400	317	50.0000
400 x 317	1	1	Base ima	400	317	50.0000
600 x 476	1	1	Base ima	600	476	60.0000

1. **No** – the product page will have only the product image, it will not include the option to combine several photos in the preview window;
2. **With Customer Photos Uploader** – customers will be able to specify the size of the photos and use combination of images in the preview window;

Config				Add New Steps Option
Title	Number of the Width *	Number of the Height *	Delete Option	
2 x 2 Images	2	2		
Title	Number of the Width *	Number of the Height *	Delete Option	
2 x 1 Images	2	1		
Title	Number of the Width *	Number of the Height *	Delete Option	
1 x 2 Images	1	2		
Title	Number of the Width *	Number of the Height *	Delete Option	
Single Image	1	1		

- *Title* - enter the name of the option, for example, N1xN2, where N1 and N2 – number of pictures vertically and horizontally respectively;
- *Number of the Width* - enter the number of images that will be displayed horizontally;
- *Number of the Height* – the number of images to be displayed vertically.

3. **With Art** – this mode is convenient for selling such pieces of art as paintings and drawings.

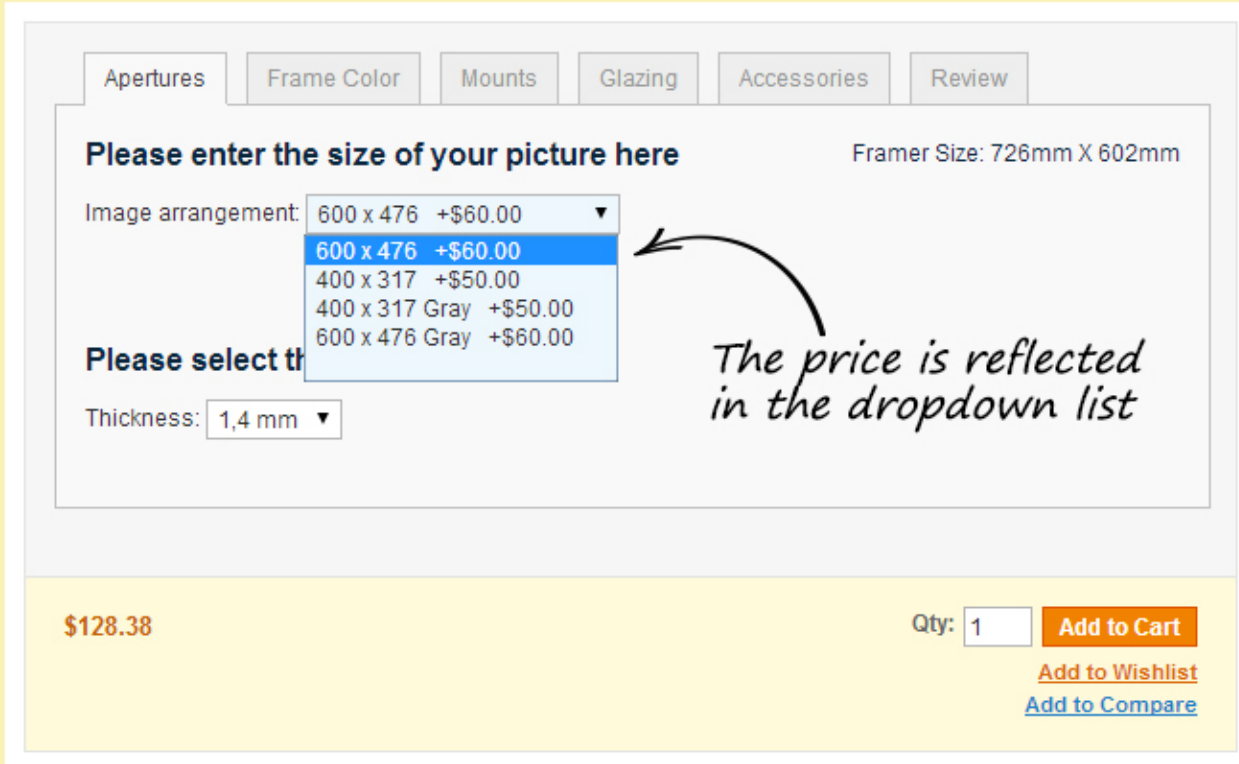

Config								Add New Steps Option
Title	Number of the Width *	Number of the Height *	Art Image *	Art Width, mm *	Art Height, mm *	Art Price *	Delete Option	
2 x 2 Images	1	1	Base Ima ▾	230	300	0.0000		
Title	Number of the Width *	Number of the Height *	Art Image *	Art Width, mm *	Art Height, mm *	Art Price *	Delete Option	
2 x 1 Images	1	1	Base Ima ▾	230	300	0.0000		
Title	Number of the Width *	Number of the Height *	Art Image *	Art Width, mm *	Art Height, mm *	Art Price *	Delete Option	
1 x 2 Images	1	1	Base Ima ▾	230	300	0.0000		
Title	Number of the Width *	Number of the Height *	Art Image *	Art Width, mm *	Art Height, mm *	Art Price *	Delete Option	
Single Image	1	1	Base Ima ▾	230	300	0.0000		

- *Title* - enter the name of the option, for example, N1xN2, where N1 and N2 – number of pictures displayed vertically and horizontally respectively;
- *Number of the Width/Height* – these fields are disabled for this mode, because paintings and drawings do not come as combined images but as a single picture in a

frame;

- *Art Image* – select the color of the painting. Paintings can come in different color variants, so here you choose which color to use for that specific product;
- *Art Width/Height* – specify dimensions of the painting;
- *Art Price* – here you can indicate the price of this specific piece of art. This price will be reflected on the product page in the dropdown list of available variants for this painting, so customers would know at once how much value is added to the total price.

3.2. Configuring Frames, Glazing, Mounts, Thickness and Wall Views

- Go to Catalog -> Framer -> Manage Frames

Click the **Add Frame** button in order to create a new frame.

The screenshot shows the 'Edit Frame' interface for 'Blick Essentials Wood Frames'. The interface is divided into two main sections: 'Change Frame' on the left and 'Config' on the right. The 'Change Frame' section includes tabs for 'Frame Information', 'more Color', 'Associated Products', and 'View 360'. The 'Config' section contains the following fields and options:

- Title ***: A text field containing 'Blick Essentials Wood Frames'.
- Description ***: A text area containing 'Made of fine-quality solid hardwood with a lovely natural woodgrain, Blick Essentials Wood Frames are ideal for when you want your artwork to do all the talking.'
- Frame Image**: A file selection button labeled 'Select file' with 'No file selected' and a 'Delete Image' checkbox.
- Default Frame Texture Left**: A file selection button labeled 'Select file' with 'No file selected' and a 'Delete Image' checkbox.
- Default Frame Texture Right**: A file selection button labeled 'Select file' with 'No file selected' and a 'Delete Image' checkbox.
- Default Frame Texture Top**: A file selection button labeled 'Select file' with 'No file selected' and a 'Delete Image' checkbox.
- Default Frame Texture Bottom**: A file selection button labeled 'Select file' with 'No file selected' and a 'Delete Image' checkbox.
- Price, meter² ***: A text field containing '12.0000'.
- Width, mm ***: A text field containing '44'.

Annotations on the screenshot include:

- An arrow pointing to the 'Description' field with the text 'Enter frame information'.
- An arrow pointing to the 'Frame Image' and texture selection buttons with the text 'Upload pictures'.

At the top of the 'Config' section, there are buttons for 'Back', 'Reset', 'Delete', 'Add Other Color', 'Save', and 'Save And Continue Edit'.

In the **Title** and **Description** fields, enter information about the frame that will be displayed on the front end.

Upload Frame Image. It will be displayed as the main image of this frame.

Upload Default Frame Texture Left, Right, Top and Bottom. These images will create an example of how the frame will look like if you selected the product image to be generated.

In the **Price** field, enter the price of the frame. In the **Width** field, enter its width.

In order to add more colors for this frame, click the **Add Other Color** button. Upload the images.

Additional colors can be managed in the **More Color** tab.

<input checked="" type="checkbox"/>	ID	Name	SKU	Type
<input type="checkbox"/>				
<input checked="" type="checkbox"/>	6	Custom Mirror Builder	Mirror	framer
<input checked="" type="checkbox"/>	5	All in One	all-in-one	framer
<input checked="" type="checkbox"/>	1	Essentials Wood Frames	framer-3-options	framer

In the **View 360** tab, upload the images of your frame that will create the 360 View. Images are displayed in the 360° View player in alphabetical order. Upload and save the images to see the order. Select the Remove check box and save selection to delete the picture(s).

- Go to Catalog -> Framer -> Manage Glazing

Click the **Add Glazing** button in order to create a new frame.

In the **Title and Description** fields, enter information about the glazing that will be displayed on the front end.

In the **Glazing Image**, select the image for this glazing option.

In the **Price** area, in the **Enable Price Ranges** menu, select if the price ranges should be enabled. If you selected **Yes**, configure the ranges: define the range by entering the maximum limit for this range in the **Scale To** field and its price in the **Price** field. If you selected **No**, enter the price for the size.

In the **Associated Products** tab, select the Framer products that should have this glazing.

- Go to Catalog -> Framer -> Manage Mount.

Click the **Add Mount** button in order to create a new frame.

In the **Title** field, name the mount. The name will be displayed on the front end.

In the **Texture Enabled** menu, select if texture is enabled. Depending on the option selected, choose the mount color or upload its texture.

In the **Price** area - **Enable Price Ranges** menu select if the price ranges should be enabled. If you selected **Yes**, configure the ranges: define the range by entering the maximum limit for this

range in the **Scale To** field and its price in the Price field. If you selected **No**, enter the price for the size.

In the Associated Products tab, select the Framer products that should have this mount.

- Go to Catalog -> Framer -> Manage Thickness.

Click the **Add Thickness** button in order to create a new thickness option.

In the **Title** field, name the thickness option. The name will be displayed on the front end.

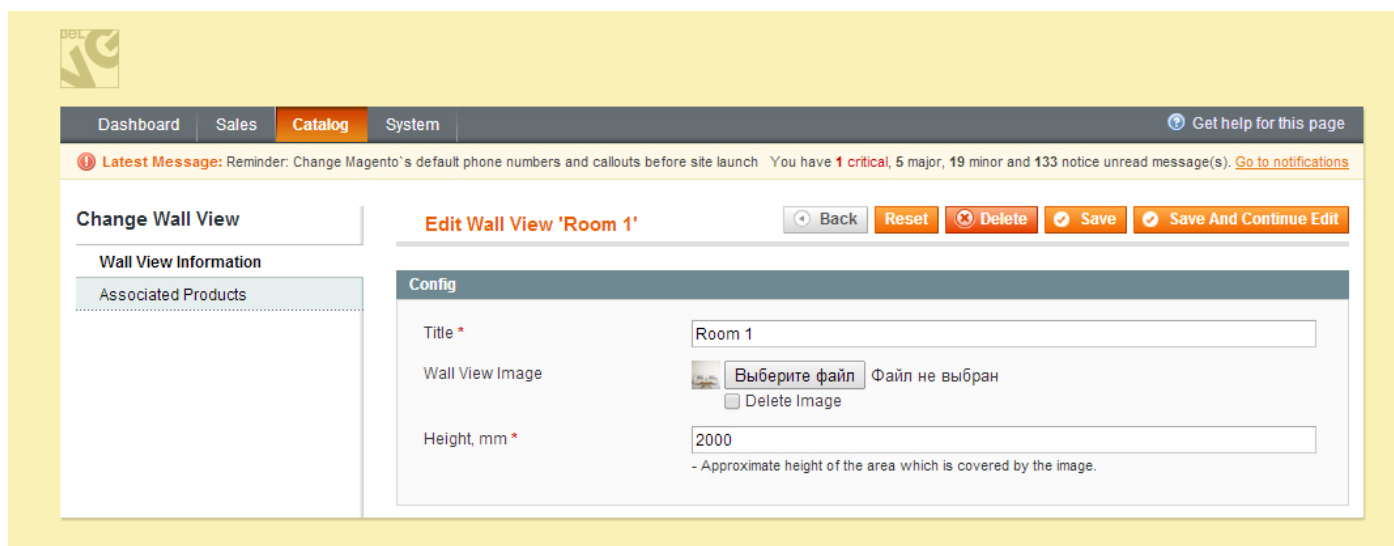

In the Price area, in the Enable Price Ranges menu, select if the price ranges should be enabled. If you selected **Yes**, configure the ranges: define the range by entering the maximum limit for this range in the Scale To field and its price in the Price field. If you selected **No**, enter the price for the size.

In the Associated Products tab, select the Framer products that should have this thickness option.

- Go to Catalog -> Framer -> Manage Wall View

This section lets you create and manage wall view settings. A **Wall View** is the visible area of an image which is used as a room preview picture.

To create a new wall view click the **Add Wall View** button.

The screenshot shows the Magento Admin interface. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog' (selected), and 'System'. A 'Latest Message' banner is visible. The main content area is titled 'Edit Wall View 'Room 1'' and includes buttons for 'Back', 'Reset', 'Delete', 'Save', and 'Save And Continue Edit'. On the left, there is a sidebar with 'Change Wall View' and 'Associated Products' tabs. The main form has a 'Config' section with the following fields:

- Title ***: Room 1
- Wall View Image**: A file upload button labeled 'Выберите файл' (Choose file) and a 'Delete Image' checkbox. The text 'Файл не выбран' (File not selected) is displayed.
- Height, mm ***: 2000

A note below the height field states: '- Approximate height of the area which is covered by the image.'

- **Title** – give name to your new wall view;
- **Wall View Image** – upload the image which will be used as a room preview;
- **Height** – indicate the height of the image visible area.

Next, move on to the **Associated Products** tab and there you need to select those products where this specific wall view will be used as a product preview image.

[STORE VIEW]

- First, enable the extension.
- Next, select if the selected front-end options should be kept.
- Then select if all the selected options should be displayed in cart.
- In the **Price** area, in the **Price for** menu, select if the price should be displayed for area or perimeter.
- In the **Send a Glued Product** menu, select if the product should be glued when sent to the client. Define the price for gluing if applicable.

- In the **Divide Options into Tabs** area, configure if Apertures & Mount options should be displayed in a single tab, if cm and inches should be displayed and if several pictures should be allowed only if mount is used.
- Select the color of a selected item in the **Active Item Color** area.

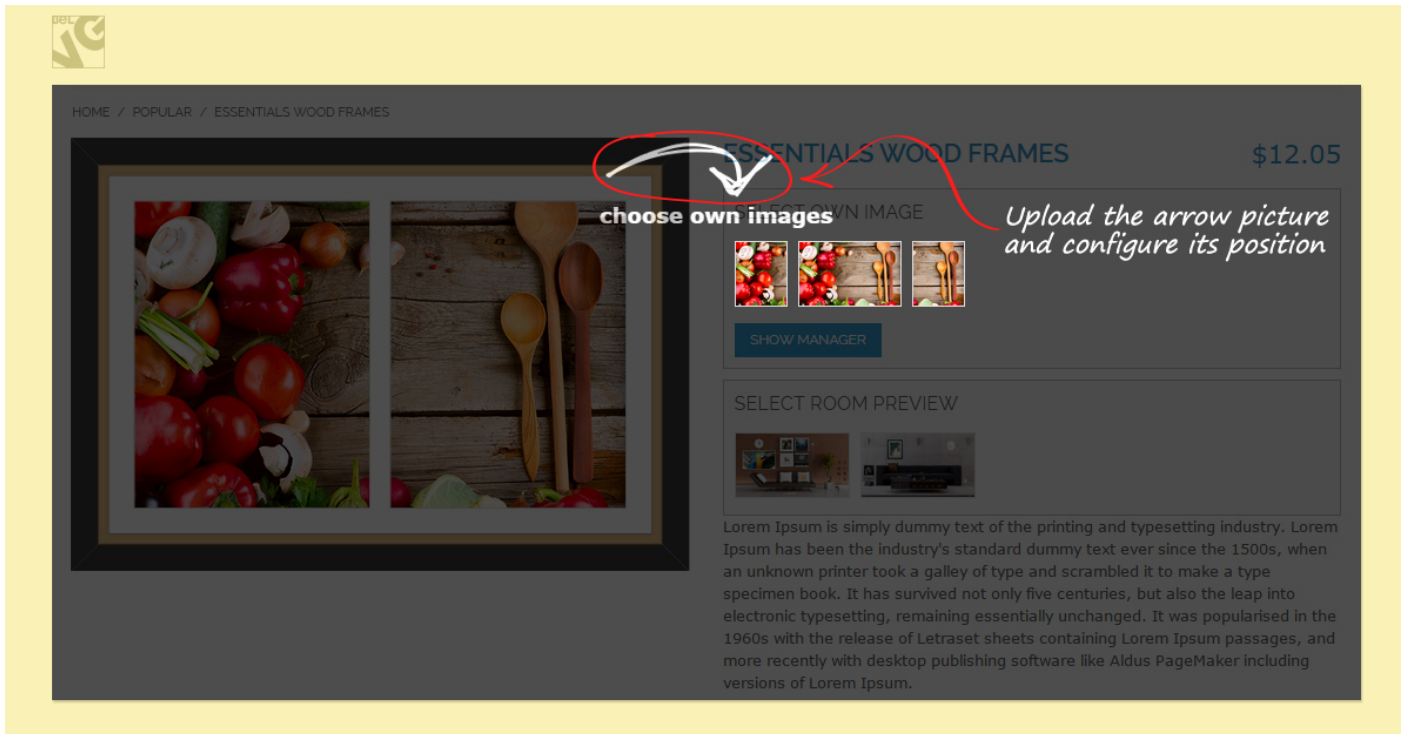

Extension configuration

Customer images		
Display Overlay	Enable	[STORE VIEW]
Overlay Opacity	0.7	[STORE VIEW]
Overlay Color	#000000	[STORE VIEW]
Front-End Arrow Image	Enable	[STORE VIEW]
Left Image	Select file No file selected	[STORE VIEW]
Arrow Image Position (CSS)		[STORE VIEW]
▲ Leave blank for position to be calculated automatically or use the following pattern - "top: 50px; left: 100px;"		
Right Image	Select file No file selected	[STORE VIEW]
Arrow Image Position (CSS)		[STORE VIEW]
▲ Leave blank for position to be calculated automatically or use the following pattern - "top: 50px; left: 100px;"		

Help Boxes		
Start		[STORE VIEW]

- In the **Customer images** area, configure the image uploader. First, configure if the Overlay should be displayed when images are being uploaded. Configure overlay Opacity (0 to 1) and Color.
- Configure the arrows design. The arrows may point from the picture to the frame and help customers upload. Upload Left and Right arrow images and configure the Arrow Image Position (CSS). Leave blank for position to be calculated automatically or use the following pattern - "top: 50px; left: 100px;".

Finally, you may enter texts to appear in the respective Text Boxes.

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

GLAZING TYPES

Acrylic

Please scroll the list below to view our full range of glazings:

☒

ACRYLIC

Clear acrylic and non-reflective acrylic are suitable alternatives to glass, offering a lightweight and shatterproof option. As with standard clear and non-reflective glass, there are no UV protective qualities. Acrylic is a safe option for oversized frames or areas with safety concerns. It is not recommended for pastels or charcoals because of the static electric charge acrylic holds which can cause dust particles to stick to the surface and detract from the clarity of the image.

☐

UV LOW REFLECTIVE ACRYLIC

The user selects glazing

Accessories can be bought together with the frame.
