### 1. Introduction to Google+ All in One

Using Magento Google+ All in One extension, you hire a virtual Google team to promote your store in Internet. All features you know from your Google+ profile or might heard of will be incorporated into your website. Customers can login with their Google accounts, put +1 for products, add your company in their circles and view your feeds in widget box.

#### Key features:

- Logging in with Google accounts
- +1 button to like and share products
- +1 button to tell about your store in Google+
- Adding store to customers' circles
- Widget box with recent feeds on every page
- Google badge with logo, +1 for company and add to circles buttons on every page
- Sharing successfully ordered products

#### Overall information

Google+, one of the most popular global social networks, threatens to overtake Facebook and other competitors. If it happens, you would better be on board, starting integrating your store with Google from now.

Allow your customers to register in your store with their

Google accounts, put +1 for products and your store and view your feeds in widget box. Both widget and badge boxes are configurable in admin panel and displayed on every website page. Clients can add your website in their circles and view your recent feeds only if you have a corporate Google profile.

| Version and compatibility:        |
|-----------------------------------|
| Magento CE 1.4+, 1.5+, 1.6+       |
| Magento EE 1.6+, 1.7+, 1.8+, 1.9+ |

# 2. How to Install

**Step 1:** Use FTP client to upload all folders from the zip package to your Magento site root folder. Be sure that you upload them to the correct directories.

Attention! If your template is not default, be sure to change the folders of the installed module from /app/design/frontend/default/default to /app/design/frontend/YOUR\_PACKAGE/YOUR\_THEME and /skin/frontend/default/default to /skin/frontend/ YOUR\_PACKAGE /YOUR\_THEME

Step 2: Login to your Magento administration panel

Step 3: Disable compilation (go to System > Tools > Compilation and select Disable) and refresh cache (go to System > Cache Management and select Refresh)

**Recommended:** Navigate to **System > Configuration,** if you can see **Google+ Connect** tab, the extension is installed right.

Step 4: Relogin to admin panel (log out and back into Magento Admin Panel).

Step 5: Go to System > Configuration > Google+ Connect and choose the right settings of extension.

**Recommended:** You may go to the frontend and try to check out. This will help you to be sure that **Google+ All in One** is working.

Step 6: If your compilation is disabled, go to System > Tools > Compilation and select Enable.

That's all! Enjoy the Google+ All in One performance.

#### **Disclaimer!**

It is highly recommended to backup your server files and database before installing this module. No responsibility can be taken for any adverse effects installation or advice may cause. Recommended you install on a test server initially to carry out your own testing.

### 3. How to Create Google+ App

To create a Google+ app you need to go to <u>https://code.google.com/apis/console</u> and generate Google API. Choose **API Access** tab in the upper left column.

| Google apis |           |                      |
|-------------|-----------|----------------------|
| API Project | Dashbo    | ard                  |
| Overview    | Dashbuaru |                      |
| Services    | Project S | Summary              |
| Team        | Name      | API Project          |
| API Access  | Owners    | itsumarava@gmail.com |

Then create and OAuth client ID.

Type the site address in the **Site URL** field.

| Creat  | e Client ID   | ×        |
|--|---|----------|
| Client   | ID Settings   |          |
| Applic   | ation type  |          |
| ۲  | Web application<br>Accessed by web provisers over a network.                                      |          |

| Google account:                | itsumarava@gmail.com  |  |  |
| Edit branding information      |   |  |  |
| Client ID for web applications |   |  |  |
| Client ID:                     | 139363449860.apps.googleusercontent.com                                     |  |  |
| Client secret:                 | Eky6JdZNQab_SMIxfo-zvBUS  |  |  |
| Redirect URIs:                 | https://example.com/path/to/callback/                                       |  |  |
| JavaScript origins:            | none  |  |  |

Now your Google App is created. Congratulations!

### 4. How to Configure

Log in to the admin panel, and we will show you how to configure the extension step by step.

To view Google+ extension settings, go to **System** -> **Configuration** -> **Google+ Connect** (left column).

You should be very attentive entering Google+ page link. You won't be able to connect your Google profile to your store if it was created as an individual profile. Follow our instructions instead.

If you have a personal profile in Google+, you will see the option of creating a Google+ page in right column.

Do you have questions about extension configurations?

Contact us and we will help you in a moment.

#### 5. How to Use

It's time to get acquainted with **Google+ All in One** features and the ways customers may use them. We will visually review extension options and activities related to them.

![](_page_15_Picture_2.jpeg)

When customers press +1 button in Google badge, they like and share your entire website in Google+.
