1. Introduction to One Page Checkout with Cart

We are proud to present you the long-awaited update for **Magento One Page Checkout module**. We made our extension even better. Your customers won't spend as much time for checkout process as they do for choosing the product. Shopping must be fun, so let's arrange that! No multiple pages to go through, no page reloading to make another purchase – now checkout is fantastically easy.

Magento One Page Checkout key features:

- Everything is on one page, there isn't any other steps, as page reloading or checkout realization
- Easy checkout page interface
- Your cart is added to the checkout page
- You can delete the item from the cart, affecting instantly the account order

Overall information

Magento One Page Checkout extension transforms your clumsy checkout service into the fast all-in-one form, which requires minimum time and effort to fill in. Customers will not refuse the purchase because of the large number of pages and fields to fill.

And, moreover, your buyers will be able to see their cart displayed on the same page! And customers can even instantly delete the item they don't need without going back to the cart!

Your customers will thank you for such a quick and easy purchase process.

2. How to Install

Step 1: Use FTP client to upload all folders from the zip package to your Magento site root folder. Be sure that you upload them to the correct directories.

Attention! If your template is not default, be sure to change the folders of the installed module from `/app/design/frontend/default/default` to `/app/design/frontend/default/YOUR_THEME` and `/skin/frontend/default/default` to `/skin/frontend/default/YOUR_THEME`

Step 2: Login to your Magento administration panel

Step 3: Refresh cache (go to **System > Cache Management** and select **Refresh**) and disable compilation (go to **System > Tools > Compilation** and select **Disable**)

Recommended: Navigate to **System > Configuration**, if you can see **Cart Checkout** tab, the extension is installed right.

Step 4: Relogin to admin panel (log out and back into Magento Admin Panel).

Step 5: Go to **System > Configuration > Cart Checkout** and choose the right settings of extension (**Enable**).

Recommended: You may go to the frontend and try to check out. This will help you to be sure that **One Page Checkout** is working.

Step 6: Go to **System > Tools > Compilation** and select **Enable**.

That's all! Enjoy the **One Page Checkout** performance.

Disclaimer!

It is highly recommended to backup your server files and database before installing this module. No responsibility can be taken for any adverse effects installation or advice may cause. Recommended you install on a test server initially to carry out your own testing.

How to Deactivate

Step 1. Disable Extension.

Log into **Magento Admin Panel** and go to **System** → **Configuration** → **Cart Checkout** → **Settings**
Select "Disable" to deactivate the extension. Click "Save Config" button.

The extension is now deactivated.

Step 2. Clear cache.

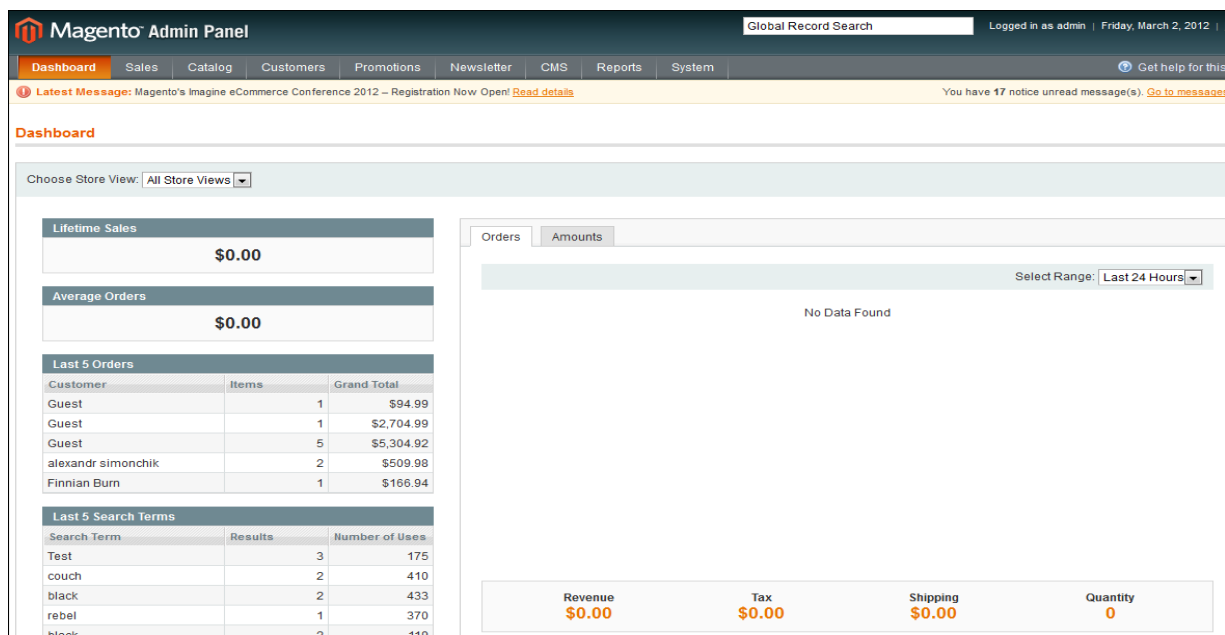

Go to **System** → **Cache Management**.

Clear the store cache.

3. How to Configure

Before you understand how this extension works in frontend, we'll show you how to configure the extension in the admin panel. It is a very simple process.

First, log in to the admin panel. This is a standard view.

The screenshot displays the Magento Admin Panel dashboard. At the top, there is a navigation bar with tabs for Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, and System. A search bar and user information (Logged in as admin | Friday, March 2, 2012) are also visible. Below the navigation bar, there is a message banner and a 'Choose Store View' dropdown set to 'All Store Views'.

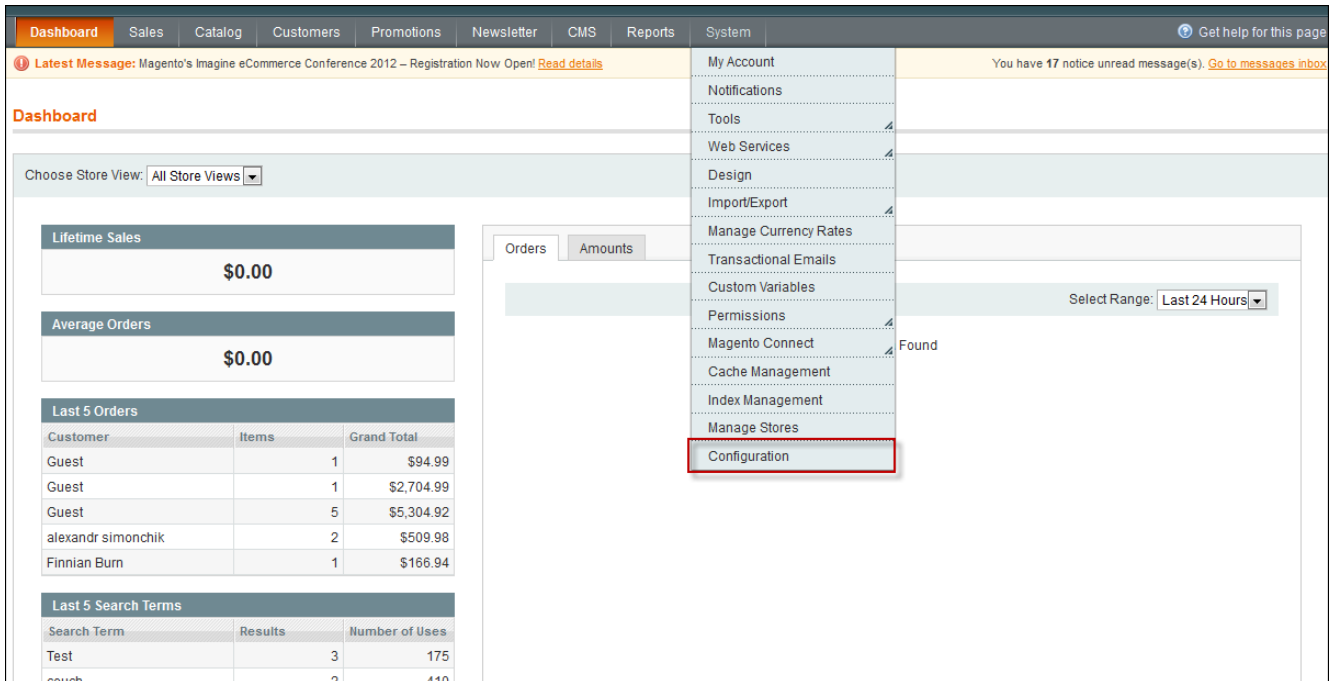

The dashboard is divided into several sections:

- Lifetime Sales:** A box showing a total of \$0.00.
- Average Orders:** A box showing an average of \$0.00.
- Last 5 Orders:** A table listing recent orders with columns for Customer, Items, and Grand Total.
- Last 5 Search Terms:** A table listing search terms, results, and the number of uses.
- Orders:** A section with tabs for Orders and Amounts. It shows a 'No Data Found' message and a 'Select Range' dropdown set to 'Last 24 Hours'.
- Summary:** A row of four boxes showing Revenue (\$0.00), Tax (\$0.00), Shipping (\$0.00), and Quantity (0).

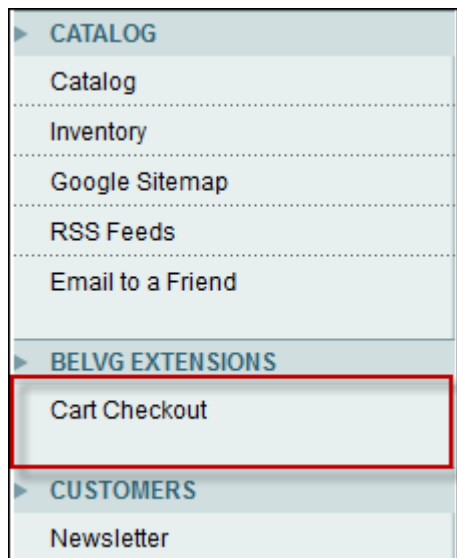

Customer	Items	Grand Total
Guest	1	\$94.99
Guest	1	\$2,704.99
Guest	5	\$5,304.92
alexandr simonchik	2	\$509.98
Finnian Burn	1	\$166.94

Search Term	Results	Number of Uses
Test	3	175
couch	2	410
black	2	433
rebel	1	370
black	2	119

Now navigate to **System -> Configuration**

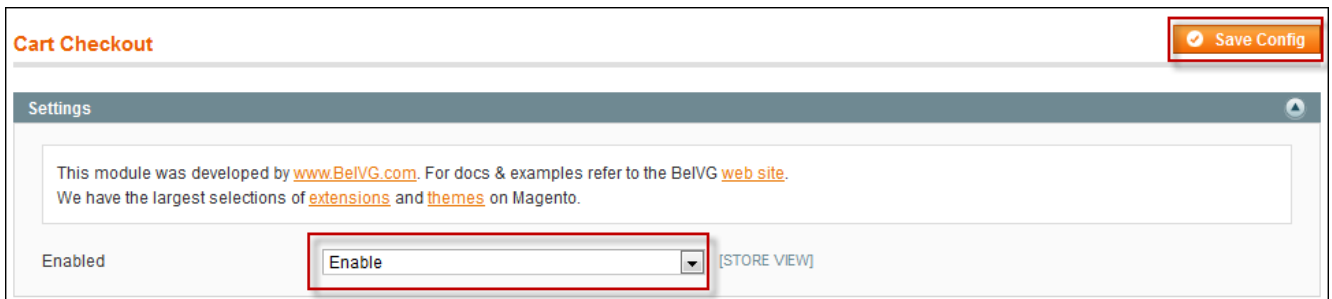

Then, you'll see a menu **Cart Checkout**.

Here, you'll see settings for **One Page Checkout** extension.

You should choose **Enable** if you want the extension to be available to your customers.

The screenshot shows the configuration interface for the 'Cart Checkout' module. At the top right, there is a 'Save Config' button. Below it is a 'Settings' section with a text box containing the following information: 'This module was developed by www.BelVG.com. For docs & examples refer to the BelVG [web site](#). We have the largest selections of [extensions](#) and [themes](#) on Magento.' Below the text box, the status is 'Enabled' and a dropdown menu is set to 'Enable'. To the right of the dropdown is a '[STORE VIEW]' link. The 'Save Config' button and the 'Enable' dropdown are both highlighted with red boxes.

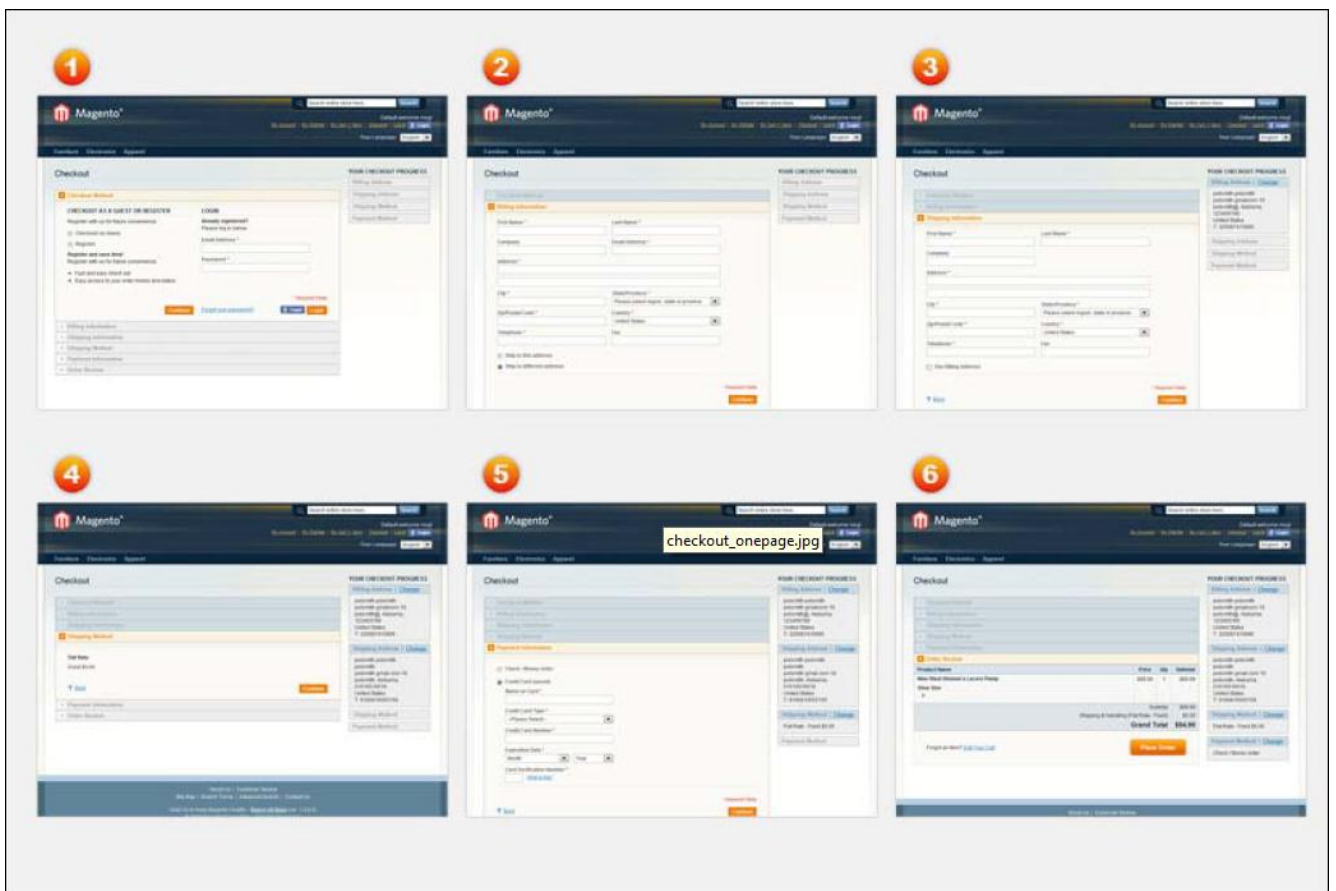

After selecting the necessary settings, please don't forget to press **Save Config** button.

This is very simple, isn't it?

4. How to Use

It's time to get acquainted with **One Page Checkout with Cart** features and the ways customers take benefit of them.

Standard checkout process takes 6 steps. The customer have to complete each page before go the next one.

So, as you see, standard Magento checkout requires multiple pages to go through and page reloading to make another purchase.

Some customers leave the checkout process unfinished due to page loads.

After installing the One Page Checkout extension customers get a much better and user-friendly checkout page that leaves them busy during the checkout process.
