# **1. Introduction to Price List Export**

With Price List extension you allow customers to download price lists without your assistance.

With this extension you won't have to manually create price lists since it creates them automatically. You only need to make a few clicks to add downloadable price list as a widget. This widget can be placed anywhere on your website. It's a really convenient way for customers and retailers to get your price list. You can put it anywhere on your website. There can be a unique price list with all prices for all products or separate price lists for different categories.

You can select attributes for export and exclude some categories that you don't want to show in the pricelist.

#### **Key features**

- Easy way to download price lists for customers;
- No need to manually upload price lists;
- Price list automatic generation;
- Limit customers groups that can see your price lists;
- Additional attributes can be added to price lists;
- Exclude certain categories from the price list;
- Configure Product and Categories Sorting criteria;
- Place icons anywhere on your website using default Magento widget.

## 2. How to Install Price List Export Extension

Magento 2 provides a convenient way to manually install a module via composer. In case you got an extension from a provider like a zip-file, follow <u>this instruction</u>.

Once you install the module manually it is needed to complete the installation of two components via composer:

- phpoffice/phpexcel console command: composer require phpoffice/phpexcel:1.7.9
- mpdf: console command: composer require mpdf/mpdf:6.\*.\*

This actions should be done only in case of manual installation.

Further run the following commands:

- 1. Enable module with php bin/magento module:enable BelVG\_Pricelistexport
- 2. Run php bin/magento setup:upgrade
- 3. Recompile DI php bin/magento setup:di:compile
- 4. Recompile static files: php bin/magento setup:static-content:deploy
- 5. Flush cache php bin/magento cache:flush
