1. Introduction to Private Sales

Whenever you need to restrict access to your webstore or make it less public, use **Magento Private Sales** extension. Creating a closed community (resellers, private individuals), admin may block login or registration options and add customers on his/her own. Admin defines a landing page for users to be placed on and sets exceptions – visible zones.

Key features:

- Restricting access to guests
- Allowing/denying registration to the public
- Specifying landing page for visitors
- Assigning exception pages to be visible
- Allow/denying access to CMS pages

Overall information

Are you planning to offer products at a special price to a limited number of people? Then deny access to visitors, who are not registered or even block the registration option for a mass public.

Admin is in charge of accesses to any content of the store. He/she assigns exceptions to be visible, ex. category page. In this case customers will be able to view categories, but will fail trying to open product pages.

Landing and CMS page visibility are also configurable.

2. How to Install

Step 1. Check Permissions.

Make sure the "app", "skin", "media" and "js" directories of your Magento and all directories inside them have full written permissions or set permissions on each directory equal to 777 or 0777.

Important! Change all permissions back after installation.

Read more about permissions here.

Step 2. Disable Cache.

Log into MagentoAdmin Panel and go to System \rightarrow Cache Management and disable cache. Read more about Cache Management here.

Step 3. Disable Compilation.

Log into MagentoAdmin Panel and go to System \rightarrow Tools \rightarrow Compilation and disable the compilation.

Step4. Upload files

Upload all files and folders from folder to the installation directory of your Magento software using an FTP client.

Step 5. Re-login.

Log out and back into MagentoAdmin Panel.

Step 6. Enable extension.

a) Go to **System** → **Configuration**. In the left column you will see the new tab – **Belvg**

Extensions.

b) Enable extension for the whole website or selected store.

Now extension is installed and enabled.

After this step you can change all permissions, cache and compilation settings back.

How to Deactivate

Step 1. Disable Extension.

Log into MagentoAdmin Panel and go to System \rightarrow Configuration \rightarrow Private Sales \rightarrow Settings Select "Disable" to deactivate the extension. Click "Save Config" button.

The extension is now deactivated.

Step 2.Clear cache.

Go to System \rightarrow Cache Management.

Clear the store cache.

3. How to Configure and Use

Log in to the admin panel, and we will show you how to configure the extension step by step.

To enable the extension, go to **System -> Configuration -> Private Sales -> Settings** on your Dashboard. Choose *Yes* to *Run Private Sales Mode*.

ivate Sales			Save Cont
