1. Introduction to Product Reviews Extended

Do advertising of your products with reviews and ratings, using Product Reviews Extended module. Review feature becomes a quick tool of getting users' opinions about your products and popularizing them at the same time. Item definitions like "Awesome", "Good", "Not for Me" are available for viewers' evaluation. When users think you have something awesome in your store, they'd better share it.

Key features:

- Reviewing all items in the store
- Review moderation
- · Setting own rating system
- · Automatic review division based on the amount of product stars

The extension will navigate your customers through a variety of items in order to help them finally make their choice.

The extension enables the option of reviewing and rating your products. The system will arrange results automatically and then display them with overall review numbers in customer experience unit.

All incoming reviews have to pass moderation. It was made to avoid spam, fraud and malicious remarks.

You can manage the rating system and create your own rating tags like "Service" or "Shipping speed".

2. How to Install

Step 1. Check Permissions.

Make sure the "app" and "skin" directories of your Magento and all directories inside them have full written permissions or set permissions on each directory equal to 777 or 0777.

Important! Change all permissions back after installation.

Read more about permissions here.

Step 2: Use FTP client to upload all folders from the zip package to your Magento site root folder. Be sure that you upload them to the correct directories.

Attention! If your template is not default, be sure to change the folders of the installed module from /app/design/frontend/default/default to /app/design/frontend/default/YOUR_THEME and /skin/frontend/default/default to /skin/frontend/default/YOUR_THEME.

Step 3: Login to your Magento administration panel

Step 4: Refresh cache (go to System > Cache Management and select Refresh) and disable compilation (go to System > Tools > Compilation and select Disable)

Recommended: Navigate to **System > Configuration**, if you can see **Advanced Review** tab, the extension is installed right.

Step 5: Relogin to admin panel (log out and back into Magento Admin Panel).

Step 6: Go to **System > Configuration > Advanced review** and choose the right settings of extension.

Recommended: You may go to the frontend and try to check out. This will help you to be sure that **Product Review Extended** is working.

Step 7: Go to System > Tools > Compilation and select Enable.

That's all! Enjoy the Product Reviews Extended performance.

Disclaimer!

It is highly recommended to backup your server files and database before installing this module. No responsibility can be taken for any adverse effects installation or advice may cause. Recommended you install on a test server initially to carry out your own testing.

How to Deactivate

Step 1. Disable Extension.

Log into MagentoAdmin Panel and go to System \rightarrow Configuration \rightarrow Advanced review \rightarrow Settings

Select "Disable" to deactivate the extension. Click "Save Config" button.

The extension is now deactivated.

Step 2.Clear cache.

Go to System \rightarrow Cache Management.

Clear the store cache.

3. How to Configure

Now we want to tell you how to configure the extension in the admin panel.

First, log in to the admin panel. After that, navigate to **System > Configuration**.
