1. Introduction to Referral Bonus and Reward System v.2.0

Magento **Referral Bonus and Reward System** is a useful module that motivates your customers to invite their friends to your store. Users profit from every successful referral registrations or purchase. Allow your customers to use social services, email and direct link for sharing invitations with new Magento Referral Bonus and Reward System.

Key features:

- Invite new users in a huge variety of ways;
- Get a discount for new referrals;
- Use this discount for future purchases;
- Let your customers control the amount of points they want to spend on a purchase;
- Invite users via email systems and social services or a direct link;
- Share points with other registered users.

Overall Information

Now there is no need to spend time for inventing new ways of attracting new visitors to your store – your loyal customers can help you do this.

The Referral Bonus module allows you to gift your customers with special points for every extra person whom they bring to a successful registration and/or purchase on your website. Customers can later spend these points on their own purchases or keep and even share with some other registered users.

The module provides a list of various methods which a customer can use to attract more friends and acquaintances: to send special invitation e-mails directly from their account, share referral links via social media and even import their Gmail, Yahoo or MSN address books into their store account to have a greater list of potential customers whom they can bring to your store.

This extension can make your store from just another place to purchase things, into a real community with highly-motivated and loyal customers who will take much of the burden of promoting your website in social media and attracting new customers on their shoulders.

Do not miss you chance for a good promotion opportunity!

2. How to Install and Deactivate

Step 1. Check Permissions.

Make sure the "app" and "skin" directories of your Magento and all directories inside them have full written permissions or set permissions on each directory equal to 777 or 0777.

Important! Change all permissions back after installation.

Read more about permissions [here](#).

Step 2: Use FTP client to upload all folders from the zip package to your Magento site root folder. Be sure that you upload them to the correct directories.

Step 3: Login to your Magento administration panel

Step 4: Refresh cache (go to System > Cache Management and select Refresh) and disable compilation (go to System > Tools > Compilation and select Disable)

Recommended: Navigate to System > Configuration, if you can see Referralreward tab, the extension is installed right.

Step 5: Relogin to admin panel (log out and back into Magento Admin Panel).

Step 6: Go to System > Configuration > Referralreward and choose the right settings of extension.

Recommended: You may go to the frontend and try to check out. This will help you to be sure that Referral Bonus and Reward System is working.

Step 7: Go to System > Tools > Compilation and select Enable.

That's all! Enjoy the Referral Bonus and Reward System performance.

How to Deactivate

Step 1. Disable Extension.

Log into Magento Admin Panel and go to System → Configuration → Referral reward
→Settings

Select "Disable" to deactivate the extension. Click "Save Config" button.

The extension is now deactivated.

Step 2. Clear cache.

Go to System → Cache Management.

Clear the store cache.

3. How to Create Gmail, Yahoo and Hotmail Apps

Creating Google API

To create a Gmail app you need to visit <https://code.google.com/apis/console> .

- Go to APIs&auth -> Registered apps -> click Register APP

The screenshot shows the Google Cloud Console interface. On the left, a navigation menu lists various services: Overview, APIs & auth (with sub-items: APIs, Registered apps, Consent screen, Notification endpoints), Permissions, Settings, Support, Compute Engine, Cloud Storage, Cloud SQL, BigQuery, and Cloud Development. The 'Registered apps' section is highlighted. In the main content area, a red button labeled 'REGISTER APP' is circled in black. A handwritten arrow points from the button to the text 'Click to register a new app'.

- Enter name for your application ->select **Web Application** radio button -> click **Register**

Google Cloud Console

< API Project

Register new application

You need to register your application to get the necessary credentials to call a Google API.

Name

Platform

- Web Application
- Android
- iOS
- Chrome
- Native Windows Mobile, Blackberry, desktop, devices, and more

Enter name for your application and select Web Application radio button

- Click OAuth 2.0 Client ID

My App

[Generate](#)

Certificate
Access application-specific data that comes from a server

Server Key
Access data that comes from a server, and that is not associated with an account

Browser Key
Access data that comes from a browser, and that is not associated with an account

Copy and save your Client ID and Secret codes

*Enter authorized redirect URL -
http://YourStoreURL.com/referralreward/gmail/save/
(replace YourStoreURL.com with your store URL)*

Copy and save your **Client ID** and **Secret** codes which you will later need to use in the module.

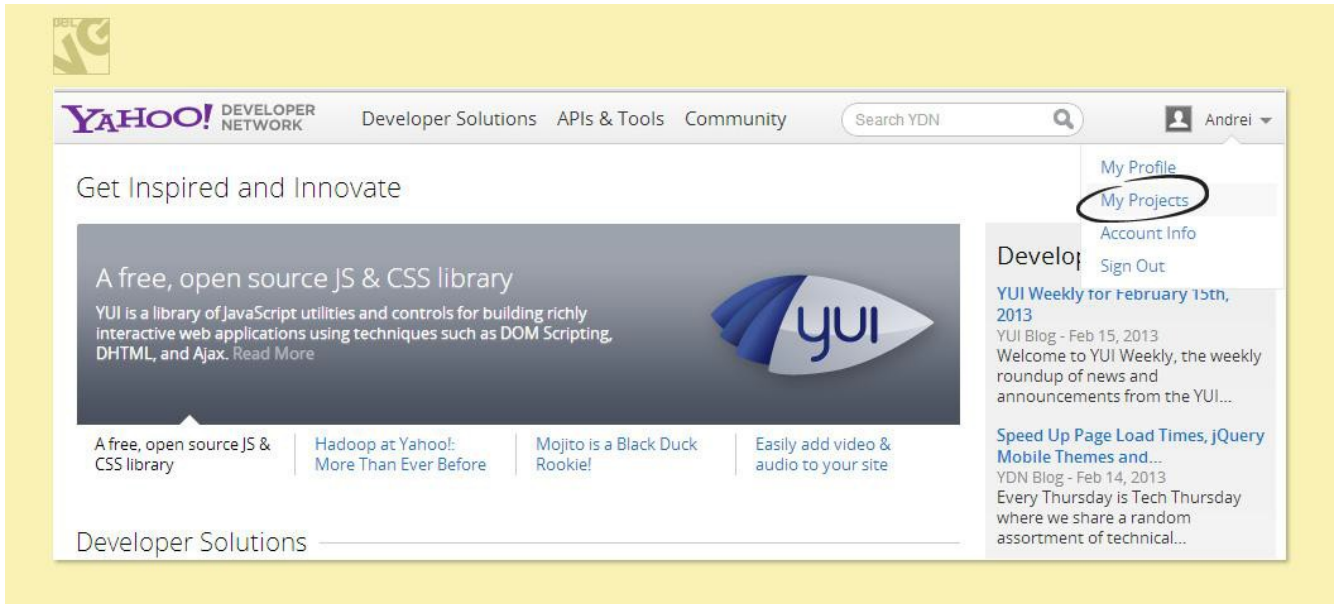

In the Redirect domain field enter the following:

<http://YourStoreURL.com/referralreward/gmail/save/>

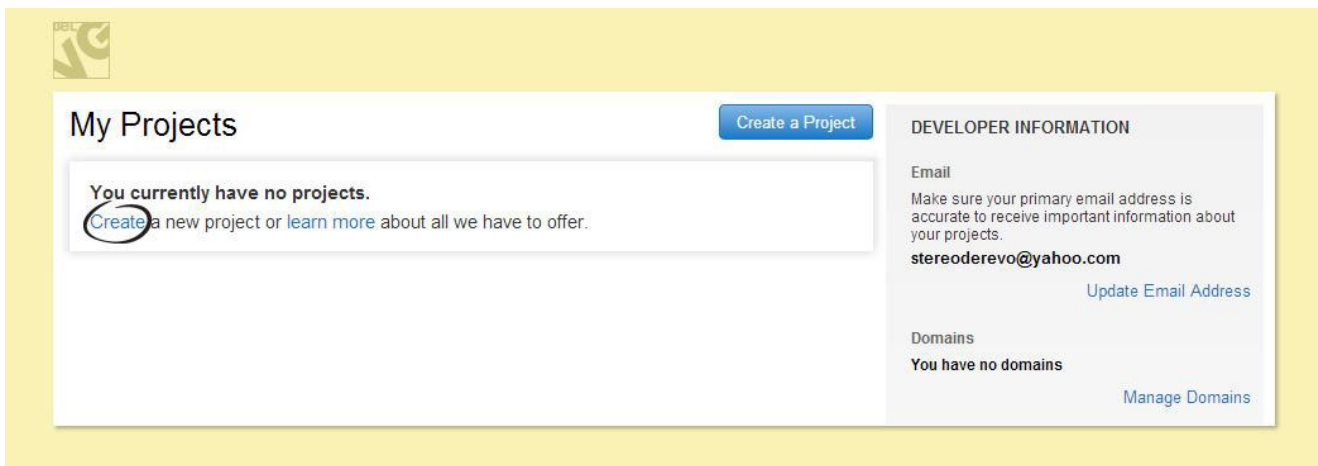

Creating Yahoo! API

To create a Yahoo app you need to go to <http://developer.yahoo.com/> and select My Projects in the menu at the upper right corner of the screen.

Read Yahoo! Terms of Use. If you accept them, click Accept to proceed. Next, click Create to create a new project.

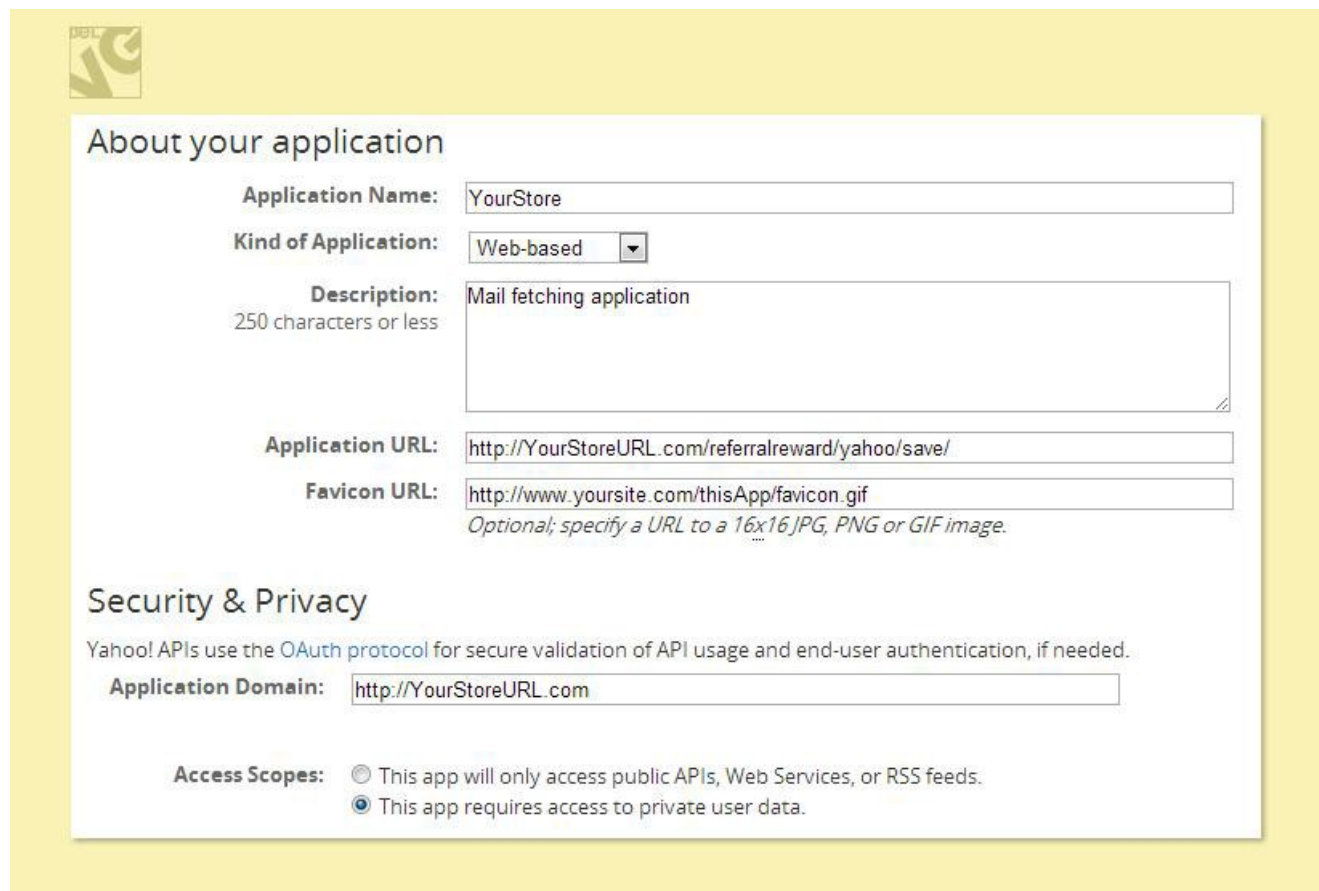

Fill in the form fields. In the Application URL field enter the following:

<http://YourStoreURL.com/referralreward/yahoo/save/>

In the Application Domain field enter the following:

<http://YourStoreURL.com>

Select the This app requires access to private user data checkbox.

The screenshot shows a form titled "About your application" with the following fields and options:

- Application Name:** YourStore
- Kind of Application:** Web-based (dropdown menu)
- Description:** Mail fetching application (text area, 250 characters or less)
- Application URL:** <http://YourStoreURL.com/referralreward/yahoo/save/>
- Favicon URL:** <http://www.yoursite.com/thisApp/favicon.gif>
Optional; specify a URL to a 16x16 JPG, PNG or GIF image.

Security & Privacy

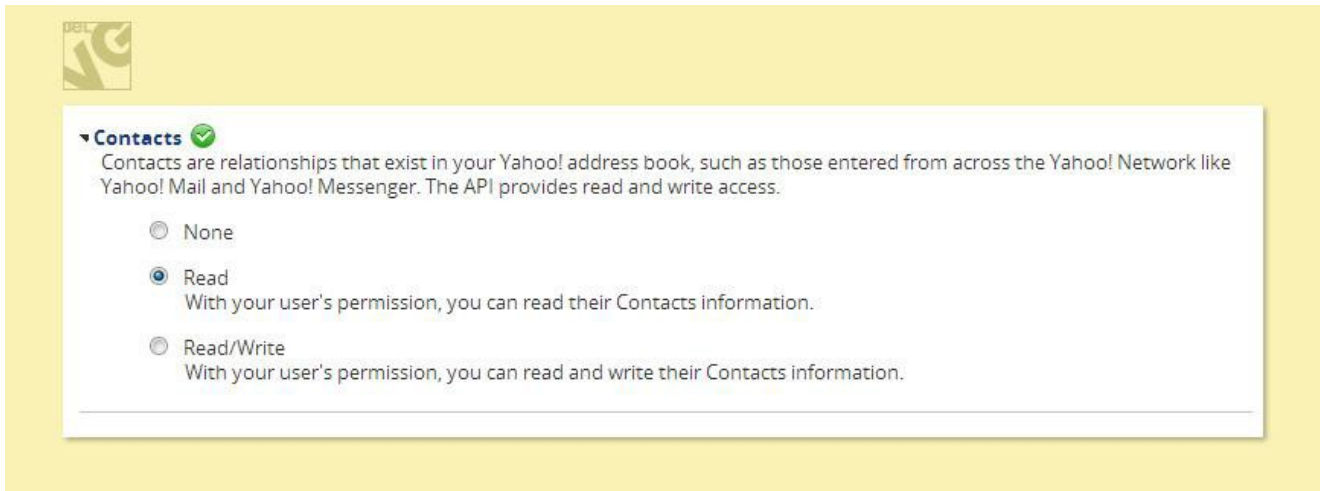

Yahoo! APIs use the OAuth protocol for secure validation of API usage and end-user authentication, if needed.

Application Domain: <http://YourStoreURL.com>

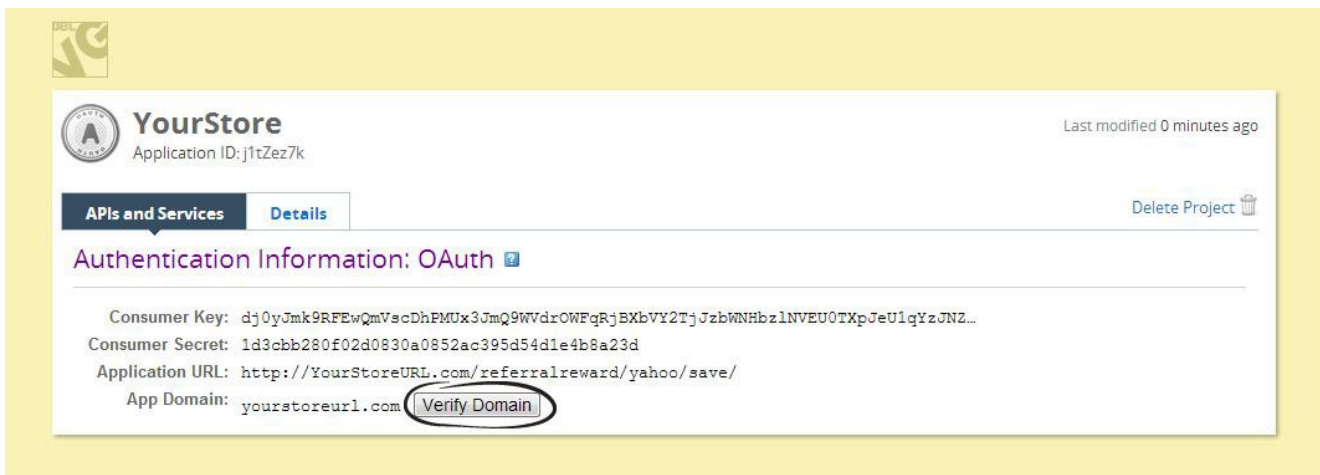

Access Scopes:

- This app will only access public APIs, Web Services, or RSS feeds.
- This app requires access to private user data.

In the list find Contacts and select the Read checkbox.

Read the Yahoo! Developer Network Terms of Use and select the respective box if you agree. Click the Get API Key button.

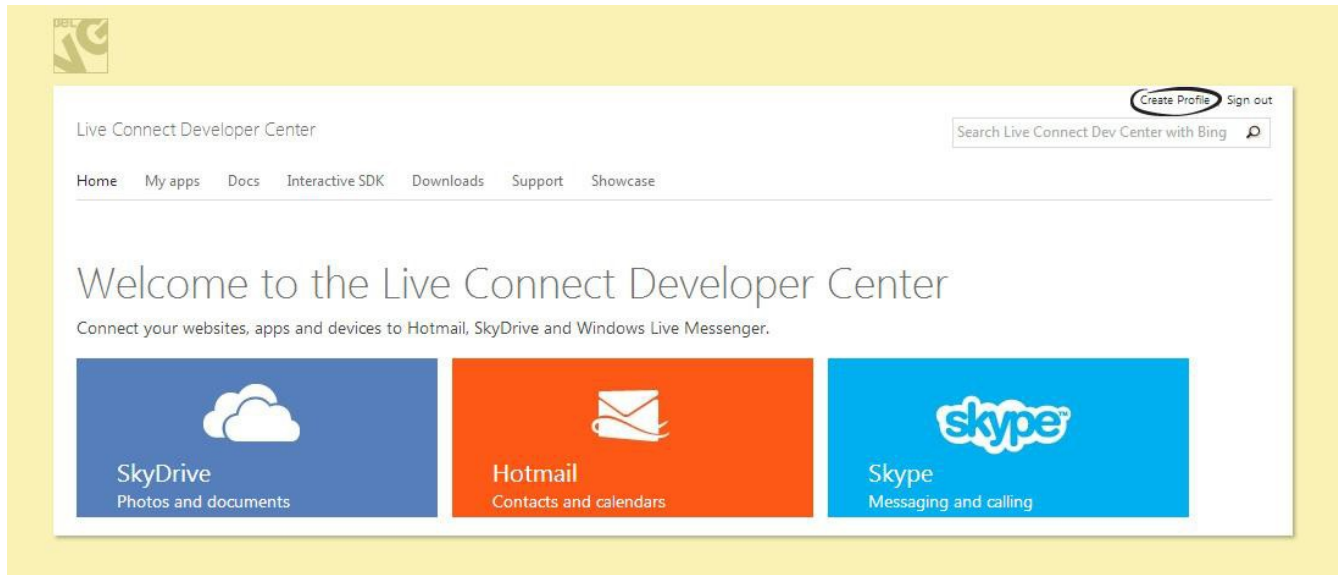

It's strongly recommended to verify your domain. In order to do that, click the Verify Domain button.

Creating a Hotmail API

To create a Hotmail app you need to go to <http://msdn.microsoft.com/en-us/live/default.aspx> and select My Apps at the upper side of the screen.

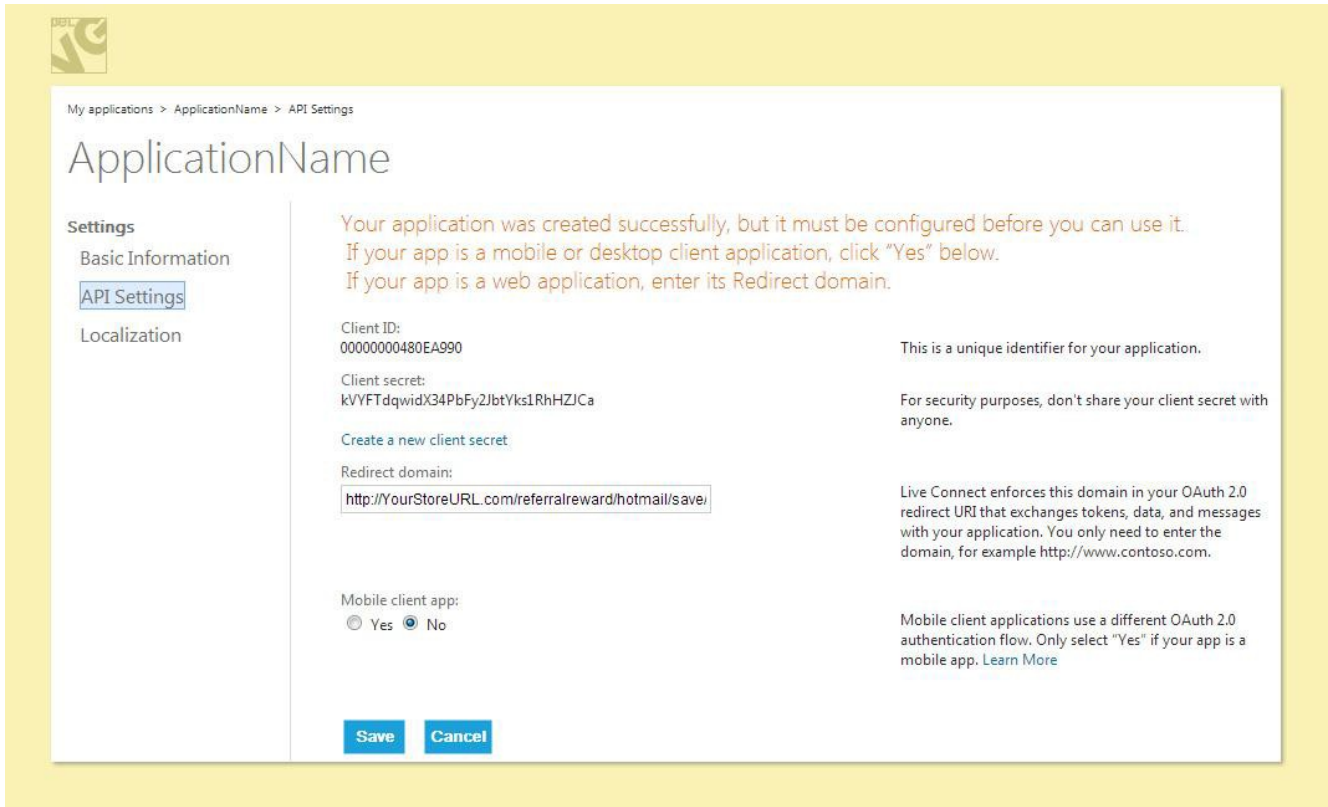

Enter Application name, read the Live Connect terms of use and click I accept if you do. In

the Redirect domain field enter the following:

<http://YourStoreURL.com/referralreward/hotmail/save/>

Save your configuration.

The screenshot shows the 'API Settings' page for an application named 'ApplicationName'. The page is set against a yellow background. At the top left, there is a breadcrumb trail: 'My applications > ApplicationName > API Settings'. Below this, the title 'ApplicationName' is displayed. On the left side, there is a 'Settings' sidebar with three options: 'Basic Information', 'API Settings' (which is highlighted with a blue border), and 'Localization'. The main content area contains a message: 'Your application was created successfully, but it must be configured before you can use it. If your app is a mobile or desktop client application, click "Yes" below. If your app is a web application, enter its Redirect domain.' Below the message, there are three sections: 1. 'Client ID: 00000000480EA990' with a note: 'This is a unique identifier for your application.' 2. 'Client secret: kVYFTdqwidX34PbFy2JbtYks1RhHZJCa' with a note: 'For security purposes, don't share your client secret with anyone.' and a link: 'Create a new client secret'. 3. 'Redirect domain: http://YourStoreURL.com/referralreward/hotmail/save/' with a note: 'Live Connect enforces this domain in your OAuth 2.0 redirect URI that exchanges tokens, data, and messages with your application. You only need to enter the domain, for example http://www.contoso.com.' At the bottom, there is a 'Mobile client app:' section with radio buttons for 'Yes' and 'No' (where 'No' is selected). A 'Learn More' link is provided. At the very bottom, there are 'Save' and 'Cancel' buttons.

4. How to Configure

Before you understand how this extension works on frontend, we'll show you how to configure the extension in the admin panel.

Navigate to **System -> Configuration ->Referral and Reward System**.

The module settings are split into several sections, so let's describe each one in details.

Settings

This section contains the following settings:

- **Enabled** – switch on/off the module;
- **One point costs** – the cost of 1 point of in your store currency;
- **Invitation email template** – select which template will be used for the invite e-mail;
- **Notification e-mail template** – select template which will be used for your notification messages;
- **Individual registration page for invited users** – if you select 'Yes'- your invited customers will be welcomed with a special registration page, else the homepage will be loaded;
- **Points slider** – choose 'Yes' if you want to let your customers decide themselves how many points they want to spend. If you keep this feature disable customers will not be able to choose how many points they want to spend, instead the module will take as many points as necessary to cover a purchase.
- **Product attribute code** – with this attribute you can set the number of points which a customer will be rewarded for a purchase. If you enable **Used in Product List** feature in the settings of this attribute, then you will be able to show in the category list the number of points which will be given for the purchase of each listed product using `<?php echo $_product->getPoints() ?>`.

Attribute Information
Properties

	▲ Depends on design theme
Used for Sorting in Product Listing	No
	▲ Depends on design theme

- **Using points makes you earn less points for purchase** – if this feature is enabled, the more points a customer will use for the purchase the less points he will earn;
- **Point has lifetime** – enable this box if you want your points to expire after some time;

- **Points expire period** – set expiry period for your points;
- **Points transfer** – allows your customer to transfer their points to other customers.

This module was developed by www.BelVG.com. For docs & examples refer to the BelVG [web site](#). We have the largest selections of [extensions](#) and [themes](#) on Magento.

Points

Let us move on and see what kind of settings offers us the **Points** section for configuration:

- **Registration of Customer, Points** – number of points added for a successful referral registration;
- **Inviter's points** – number of points added to an inviter for a successful purchase;
- **Invitee's points** – number of points added to an invitee for a successful purchase;
- **Minimal order amount** – minimal order required to get points;
- **Order status of the application of invite points** – select which order status is required to get points for a purchase;
- **Remove points if order was cancelled** – select 'Yes' if you do not want to award any points for canceled orders;
- **Points for successful subscription** – set number of points provided for subscribing to a newsletter;
- **Remove points if unsubscribed** – select 'Yes' if you want to subtract points when a user unsubscribes;
- **Review points** – set number of points provided for an approved review.

In **Application Id** field and **Secret Key** field you should enter Id and Key you received upon creating an app (go back to section 3 for more).

4.1 How to modify a notification letter

To modify a notification letter go to **System** → **Transactional Emails** and press **Add New Template** button. Choose **Referral Reward: Default Template Invitation** in the Template dropdown menu.

Also you can use the following variables:

`{{var sendername}}`,

`{{htmlscape var=$sendername}}` – Current user: (the sender)

`{{htmlscape var=$link}}` – The referral link of current user

`{{store url=""}}` – The URL of your store

`{{skin url="images/logo_email.gif" _area='frontend'}}` – Logo of your store for the notification letter

`{{var store.getFrontendName()}}` – Store name variable

`{{htmlscape var=$message}}` – User-defined message to send to friends

Notification Email Template

Also you can use the following variables:

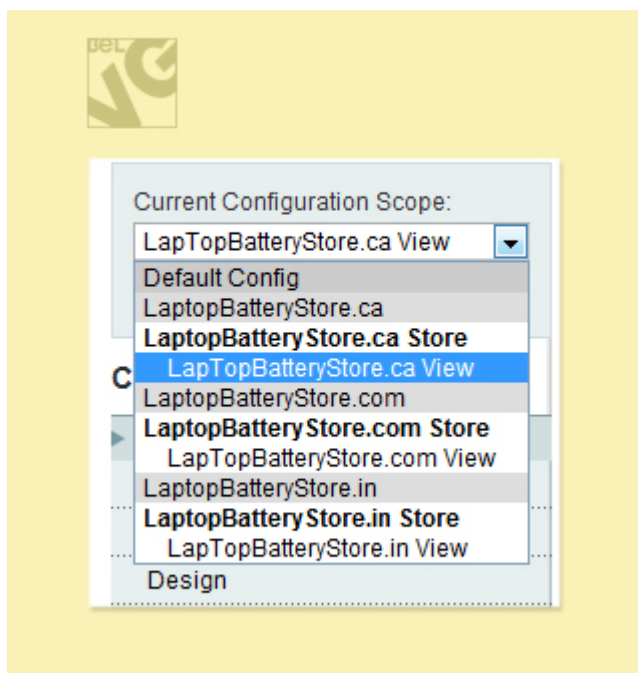

{{htmlscape var=\$points}} – the number of points rewarded

{{store url=""}} – link to the home page

How to run the extension on multiple stores

If you are planning to run this extension on multiple stores, refer to **Current Configuration**

Scope. It shows dropdown menu with all your stores. Choose the one you need.

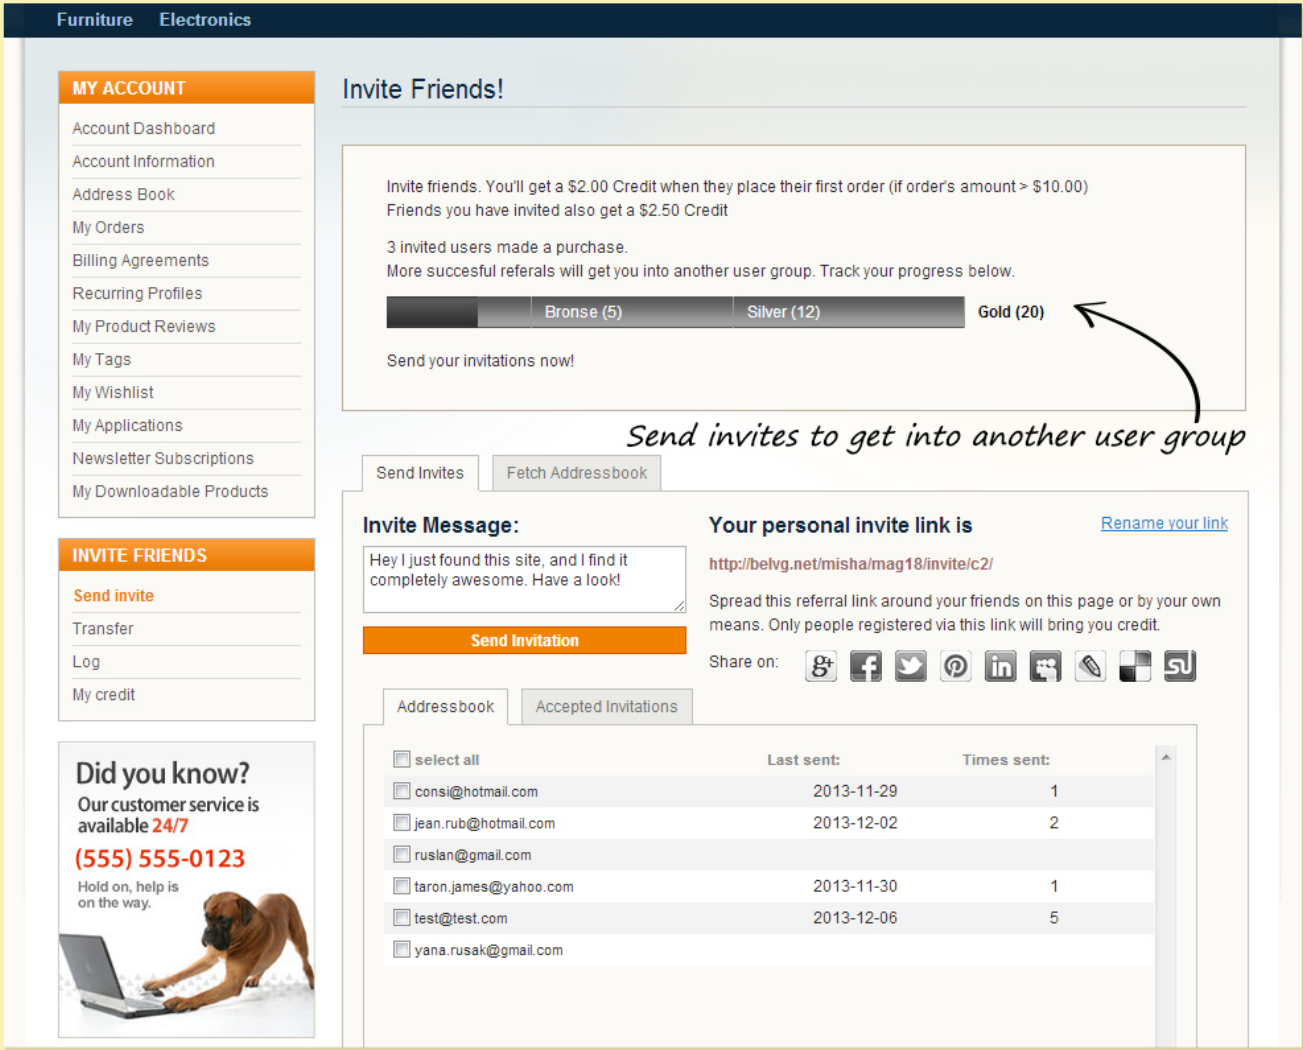

5. How to Use

It's time to get acquainted with **Referral and Reward System** features and the ways customers may use them. We will visually review extension options and activities related to them.

As soon as a user logs into his account a new **Invite Friends** section appears.

A customer logs into account to send invitations and view his credit balance

The module also allows you to transfer your earned points to some other customers. To do that simply go to the **Transfer** section and enter e-mail address of the person whom you would like to donate your points.

However, this function becomes available only after the customer completes his first order.

If you wish to know for what exactly and how many points you got – welcome to the **Log** section which can easily list you the required information!

Points transaction log

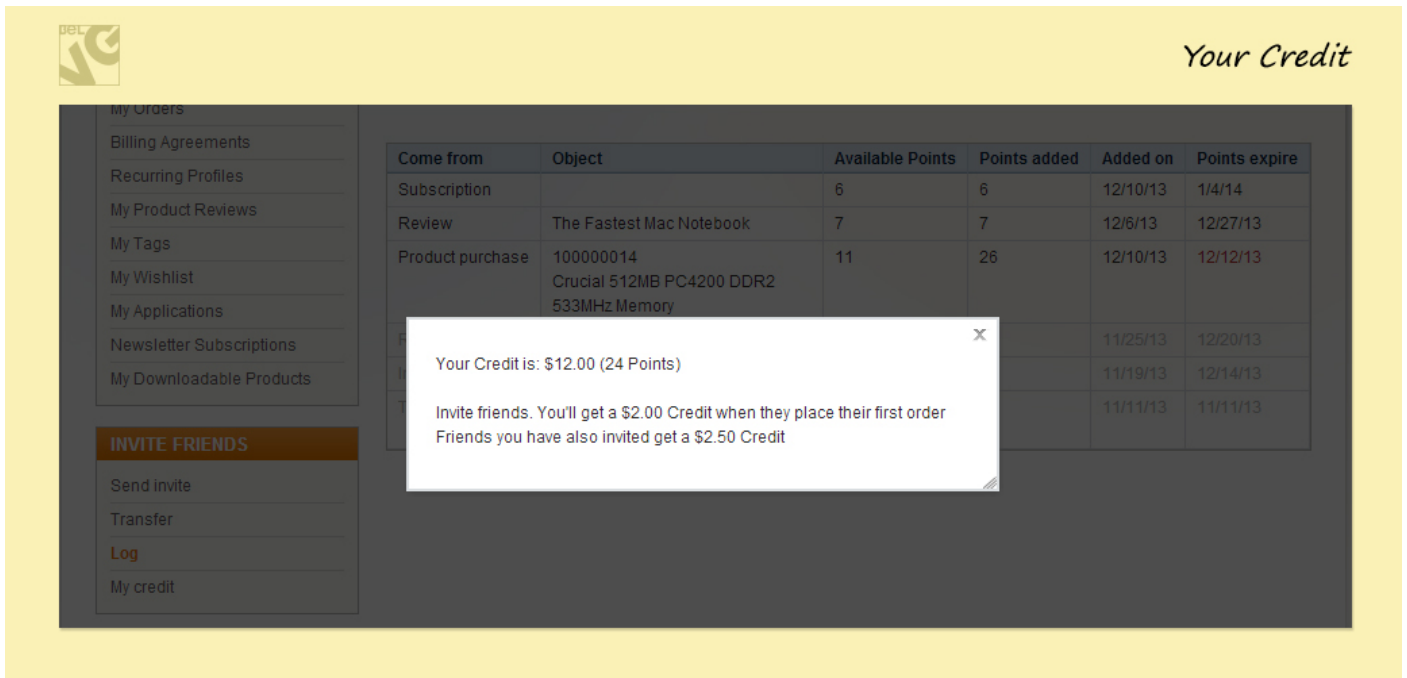

You currently have 24 points.
